INDOOR FLY TRAP

FLY FACTS

Flies are the most common pests around homes. The Indoor Fly Trap catches all types of flies that invade homes, such as house flies, cluster flies, blow flies, little house flies and garbage flies. These flies become attracted to light from windows, and can easily be captured.

EASY INSTRUCTIONS: Peel off the white strip from the back of the trap to expose the mounting adhesive. Attach the trap along and edge of a window where it will not contact drapes, blinds or their cords. Peel the front release paper to expose the sticky catching area of the Indoor Fly Trap. Use more traps for best results. Replace traps when full or after three months. Dispose of old traps in regular garbage.

SAFE FOR USE IN FOOD-HANDLING AREAS

In case of contact, remove glue with vegetable oil.
