

INSECTICIDE

RAPIDLY EFFECTIVE AND LONG-LASTING INSECT CONTROL

Mineiro™ 2 F Flex is a versatile insecticide that provides quick knockdown of insects and long-lasting residual control at low use rates. Containing the active ingredient imidacloprid, Mineiro 2 F Flex protects residential and commercial ornamentals, nurseries, interiorscapes, and turfgrass from aphids, billbugs, emerald ash borer, white grubs larvae, and many more. The easy-to-mix formulation offers sufficient residual activity so that applications can be made preceding the egg laying activity of the target pests. Mineiro 2 F Flex has a combination of foliar and systemic properties giving you full coverage plant protection. Stretch your dollar and take charge of insects today with the versatility of Mineiro 2 F Flex.

KEY BENEFITS

- Lasting residual and broad-spectrum control
- Rapid knockdown
- Controls major borer pests
- Labeled for multi-use sites
- Easy-mixing formulation with low use rates

KEY USES

- Fruit and Nut Trees
- Interior Plantscapes
- Landscape Ornamentals
- Nurseries
- Ornamental Trees and Shrubs
- Turfgrass

Imidacloprid 21.4%

FORMULATION
Suspension Concentrate

IRAC NUMBER
4A

SIGNAL WORD
Caution

PACKAGE SIZE
4 x 1 gal

RESTRICTED USE
No

Refer to label for specific use restrictions.

Relevant. Simple. Reliable.

APPLICATION SUMMARY

LANDSCAPE ORNAMENTALS

Ornamental trees, shrubs, evergreens, flowers, foliage plants, groundcovers, and interior plantscapes in and around the perimeter of industrial and commercial buildings and residential areas.

Application can be made by foliar application or soil applications, including soil injection, drenches, and broadcast sprays. Foliar applications offer locally systemic activity against insect pests.

Foliar Rate: 1.7 fl oz per 100 gallons of water.

Broadcast Rate: 0.46 to 0.6 fl oz per 1,000 sq ft.

Trees – Soil Injection & Soil Drench Rates: Apply 0.1 – 0.4 fl oz (3 to 12 mL) per inch of trunk diameter (DBH).

Shrubs – Soil Injection & Soil Drench Rates: Apply 0.1 to 0.2 fl oz (3 to 6 mL) per foot of shrub height.

TURFGRASS

Turfgrass in home lawns, business and office complexes, shopping complexes, multi-family residential complexes, golf courses, airports, cemeteries, parks, playgrounds, athletic fields, and sod farms.

Apply this product in sufficient water to provide adequate distribution in the treated area. Use equipment which will produce a uniform, coarse droplet spray, using a low pressure setting to eliminate off target drift.

Use Rate: 1.25 to 1.6 pt per acre or 0.46 to 0.6 fl oz per 1,000 sq ft.

GRASSY AREAS IN NURSERIES

Nursery grass in sites such as under or around field or container grown plants, on roadways, or other grassy areas in or around nurseries.

Use Rate: 19.2 to 25.6 fl oz per acre (1.25 to 1.6 pt per acre) or 0.46 to 0.6 fl oz (14 to 17 mL) per 1,000 sq ft.

Refer to product label for complete application and mixing instructions.

KEY INSECTS

Adelgids
Alder borer
Annual bluegrass weevil
Aphids
Armored scales
Asian long horned beetle
Asiatic garden beetle
Billbugs
Black vine weevil larvae
Bronze birch borer
Chinchbugs
Cutworms
Emerald ash borer
Eucalyptus long horned borer
European; chafer, crane fly
Flatheaded borers
Green June beetle
Japanese beetle
Lace bugs
Leaf beetles
Leafhoppers
Leafminers
Mealybugs
Mole crickets
Northern masked chafer
Oriental beetle
Pine tip moth larvae
Psyllids
Royal palm bugs
Sawfly larvae
Soft scales
Southern masked chafer
Thrips
White grub larvae
Whiteflies
