Hay-Now is a foliar applied liquid fertilizer containing N, P, K and Sulfur, Iron, and Zinc. It is specifically formulated to deliver readily available nutrients during the vegetative growth stages to enhance growth and root development. Hay-Now assists your hay crops and pastures during periods of stress to maximum production. Hay-Now is easy to use and can be tank-mixed with herbicides and pesticides. Hay-Now is safe to apply to fields where animals are present.

THE HAY-NOW PROGRAM

Foliar apply Hay-Now anytime from early spring green-up thru fall. If cutting, apply Hay-Now after every cutting with 2 to 3 inches of re-growth. If grazing, apply Hay-Now every 30 to 45 days. Suggested application rate is 1 to 2 quarts diluted in 10-20 gallons of water per acre.

When using the Hay-Now program, an early-season application of 1/2 gallon Monty's Liquid Carbon is suggested for best results. When soil is heavy clay or extreme sand or otherwise has significant compaction issues, the addition of 1 quart of Monty's Liquid Carbon with Hay-Now is also suggested. Hay-Now applied alone provides NPK and key micronutrients for your crop's best production.

Hay-Now is a liquid fertilizer that is recommended as a supplement to your current fertilizer program and is not recommended to replace the nutrients typically added to the soil. We suggest taking a soil test and have a qualified independent lab analyze the samples to determine nutrient levels in your soils and then follow recommended applications to ensure proper nutritional levels.

STORAGE AND HANDLING

Keep container closed when not in use. This product contains organic materials which may settle and should be shaken or stirred if stored. Refer to the SDS for other safety and handling information.

USE OF HAY-NOW WITH FARM CHEMICALS

The manufacturer products are designed specifically for fertility enhancement purposes. The manufacturer's products are compatible with many farm chemicals and may improve the efficacy of some pesticide applications, but the manufacturer does not guarantee it to do so. When tank mixing any of the manufacturer's products with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering. The manufacturer suggests administering a jar test and/or a strip test before adding Hay-Now to your tank mix. When mixing with other farm chemicals, it is suggested to tank mix Hay-Now only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Hay-Now. Once mixed or diluted, product should be used within 48 hours. Please call 800-978-6342 with any questions.

LIMITED WARRANTY

For a period of 12 months from the date of purchase, the manufacturer warrants that this product meets its manufacturing specifications. If it does not, the manufacturer will, at its option, replace the product or refund the purchase price. In no event shall the manufacturer be liable for special, incidental or consequential damages or for damages in the nature of penalties. The manufacturer shall not be liable in any way for claims resulting from any use of this product which is not in strict accordance with all directions, cautions and warnings on the label or labels.
