

Garden & Poultry Dust

Ready-to-use Dust

Purpose

Prozap Garden & Poultry Dust is ready to use and contains .25% permethrin. Approved for use on poultry, garden vegetables and plants. Controls northern fowl mites and lice on poultry and in poultry houses. Controls aphids, bag worms, Japanese beetles, stinkbugs, Colorado potato beetle, ants, and most vegetable crop insects. Conveniently packaged in an easy to use 2 lb. shaker container.

Description

For use on poultry:

To control Northern Fowl Mites, apply at a rate of 1 lb. per 100 birds. Ensure thorough treatment of vent area.

For use in home gardens:

For use on home gardens. Not for use on plants being grown for commercial sale or commercial use. Prozap Garden & Poultry Dust controls a wide range of insect pests. Apply when insects first appear before damage from feeding occurs. Dust lightly to cover upper and lower leaf surfaces with a thin, even film of dust. Apply when air is calm to avoid drift and contact with eyes and skin. Allow dust to settle in treated areas before reentering. Wash hands thoroughly after handling and before eating or smoking. Do not allow dust to wind drift to non-target plants or water supplies. Start applying at the farthest corner of the treatment area and work backward to avoid contact with dusted surfaces. For plants above chest height, consider using another insecticide.

Please see entire label instructions and MSDS before using and for additional uses.

Active Ingredients

Permethrin*	0.25%
Other Ingredients	99.75%
Total	100.0%

*(3-phenoxyphenyl)methyl (+/-) cis/trans 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate (Cis/Trans ratio: min. 35% (+/-) cis and max. 65% (+/-) trans.)
