Minimum Risk Pesticide: Naprovit PRO™ and Naprovit PRO Plus™ ingredients are compliant with the criteria for the EPA's FIFRA 25(b) exemption from registration as a pesticide.

Naprovit PRO™ and Naprovit PRO Plus™ do not contribute to insecticide tolerance and resistance in insects.

NAPROVIT™ Benefits for the end-user:

- COMPLETELY NON-TOXIC!
- COMPLETELY BIODEGRADABLE!
- Completely Odorless!
- Safe for use around pets!
- Will not harm aquatic life!
- Safe to use around food!
- Safe for use on or around plants!

How does Naprovit™ work?

Naprovit™ is not a neurotoxin. It is a non-toxic compound that instantly interrupts the respiratory systems of certain insects, suffocating them.

Traditional insecticides are neurotoxins, which attack an insect's nervous system. Most neurotoxins are also potentially quite harmful to humans, animals, and aquatic life.

Naprovit PRO™ and Naprovit PRO Plus™ are:

- ✓ Non-Hazardous
- ✓ Non-Staining
- ✓ Non-Combustible
- ✓ Non-Fuming
- ✓ Non-Corrosive
- ✓ Non-Flammable

"An investigation into the toxicity of Naprovit PRO to adult female mosquitoes showed that concentrations achievable in residential and commercial misting systems were able to produce a mortality rate of 77% against control mosquitoes."

Dr. Jane Bonds PhD, D.I.C.
Bonds Consulting Group LLC
June 2012

What people are saying about Naprovit™:

“My customers love that it leaves no odors, and that it is safe. I love that it keeps the equipment from clogging, and lowers my maintenance costs”

- ***Guy Findeisen, Owner, Mr. Mosquito Mister, Coral Springs, FL***

“I can't believe it works as good as the poison stuff that was used before. I also love that Naprovit is odorless.”

- ***Sara and Lester H., Homeowners, Palm Bay, FL***

“Our members hated the smell that came along with the old mosquito misting, and as an outdoor eatery, it was a real problem, along with the No-see-ums. Naprovit solved both problems!”

- ***Mark S., Country Club Manager, Boca Raton, FL***

“With a lake behind our home, the mosquito problem was bad enough, but my wife is terrified of spiders. We switched to Naprovit and neither are a problem any longer, and we can't believe it was accomplished without toxic chemicals!”

- ***Harold L., Homeowner, Kendall, FL***

“We had a terrible problem with wasp nests on our house. Since our misting company started using Naprovit PRO Plus, no more nests, no more dangerous chemicals...we won't use anything else!”

- ***Lisa C., Homeowner, Naples, FL***

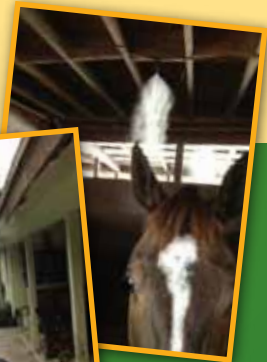

“We are a working farm that uses over 30 dogs and horses. I worried about the toxic effect around their feed and water. I switched over to Naprovit with no toxic worries. I have also benefited from eliminating fleas, which is an added benefit.”

- ***Bob Lines, Indiantown, Florida***
