

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Keep away from children, domestic animals, and pets.

Personal Protective Equipment (PPE):

All handlers (including applicators) must wear long pants, shoes, socks, and barrier laminate gloves. Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminate gloves.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of barrier laminate gloves before removing. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals, birds, and other wildlife. Dogs, cats, and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not allow bait to be exposed on soil surface. Do not apply where run-off is likely to occur. Do not contaminate water when disposing of equipment wash water or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions, use restrictions, and precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooded livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access the bait.

USE RESTRICTIONS:

This product can only be used to control the following rodent pests in and around man-made structures: House mouse (*Mus musculus*), Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*), Cotton rat* (*Sigmodon hispidus*), Eastern harvest mouse* (*Reithrodontomys humilis*), Golden mouse* (*Ochrotomys nuttalli*), Polynesian rat* (*Rattus exulans*), and Meadow vole* (*Microtus pennsylvanicus*). White-throated woodrat* (*Neotoma albigula*), Southern plains woodrat* (*Neotoma micropus*), and Mexican woodrat* (*Neotoma mexicana*). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations.

Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from any structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Burrow baiting with SureKill Brand Guardian Blocks is prohibited.

Do not sell this product in individual containers holding less than four (4) pounds of bait.

* Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, and the Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

SureKill[®] Brand

Guardian[®] blocks

KILLS RATS, MICE AND MEADOW VOLES*

Mold and Moisture Resistant

Kills *Rats, Mice and Meadow Voles**
in Wet or Dry Areas

This product may only be used inside and within 100 feet of buildings or inside of transport vehicles (ships, trains, or aircraft).

This Product May Not Be Sold in Packaging that Holds Less Than 4 Pounds of Bait.

Active Ingredient:

Diphacinone

(2-Diphenylacetyl-1, 3-Indandione)..... 0.005%

Other Ingredients:

..... 99.995%

Total..... 100.000%

EPA Reg. No. 61282-26 EPA Est. No. 61282-WI-01

KEEP OUT OF REACH
OF CHILDREN
CAUTION

FIRST AID

- Call a poison control center or doctor immediately for treatment advice.

- Have person sip a glass of water if able to swallow.

- Do not induce vomiting unless told to do so by the poison control center or doctor.

- Take off contaminated clothing.

- Rinse skin immediately with plenty of water for 15-20 minutes.

- Call a poison control center or doctor immediately for treatment advice.

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.

- Remove contact lenses, if present, after the first 5 minutes; then continue rinsing eye.

- Call a poison control center or doctor immediately for treatment advice.

NOTE TO PHYSICIAN

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁, intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

TREATMENT FOR PET POISONING

If animal eats bait, call veterinarian or 1-800-498-5743 at once.

NOTE TO VETERINARIAN

Anticoagulant Diphacinone; For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), administer Vitamin K₁.

Have the product container or label with you when calling a poison control center, doctor, or going in for treatment.

For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada)

or 1-651-523-0318 (all other areas).

Mold and Moisture Resistant

Net Contents: 288 x 1 oz. (28.3 g)

Net Weight: 18 lbs. (8.16 kg)

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice, or meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by grained openings, in corners and concealed places, between floors and wall or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: Each SureKill Brand Guardian Blocks weighs approximately 1 oz.

Rats: Apply 4 to 16 ounce-ounce SureKill Brand Guardian Blocks per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.

When baiting sewers, securely attach one end of a wire to each lock and the other end to a stationary structure, such as the bottom step of a manhole ladder or a sewer grate. Allow just enough wire for the block to rest on the manhole penching. If benching not present, suspend each block a few inches above the high water mark or secure the block on a board supported by opposing steps of the ladder. Securing blocks in this manner will reduce the chances that they will be removed by rats or water. Use 4 to 16 blocks per manhole, depending upon the apparent intensity of rat activity. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.

Mice and Meadow Voles*: Place 1 of the 1-oz. SureKill Brand Guardian Blocks in each placement location. Space placements at 8- to 12-foot intervals. Placement of two 1-oz. pieces each may be needed at points of very high mouse or meadow vole activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of new feeding by mice and meadow voles*.

Follow-Up: Replace contaminated or spoiled bait immediately. Using barrier laminar gloves, collect and dispose of all dead, exposed animals and leftover bait properly. Discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.

PESTICIDE AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.

Plastic Containers: Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill, or incineration. Do not burn, unless allowed by state and local ordinances.

Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. Do not burn, unless allowed by state and local ordinances.

DISCLAIMER

To the extent permitted by applicable law, Seller makes no representation or warrant either express or implied, for results due to misuse, improper handling, or improper storage of this material. Nor does Seller assume any responsibility for injury to person or property arising out of misuse, improper handling, or improper storage of this material.
