

Nitrate of Soda 15-0-0

GUARANTEED ANALYSIS:

Total Nitrogen (N) 15.00%
15.00% Nitrate Nitrogen

Plant Nutrients Derived From: Nitrate of Soda
F1290

Bonide's Nitrate of Soda reacts quickly in the soil to rapidly provide plants with Nitrogen. Nitrogen, one of the three major plant nutrients, stimulates early spring growth, deep green color, and stem and leaf growth. Deficiencies of Nitrogen can result in stunted plant growth.

How to read a fertilizer label.

Fertilizers are rated by three numbers, such as 15-0-0. The numbers tell what percentage of primary nutrients the fertilizer contains. The first number is the percentage of Nitrogen; the second number is the percentage Available Phosphate (P_2O_5); the third number is the percentage of soluble Potash (K_2O).

When purchasing fertilizer, keep in mind that typically the first number, or Nitrogen, emphasizes a green color and denser foliage. The middle number, Available Phosphate, emphasizes the development of flowers, fruits or vegetables. And the third number, Soluble Potash, emphasizes overall plant hardiness and its ability to withstand stress.

DIRECTIONS FOR USE

Apply Only as Directed. Wash off any plant food which accidentally gets on foliage.

General Gardening: Thoroughly incorporate into the soil, to a depth of 4 to 5 inches, at the rate of 1.4 lb. (2 1/2 cups) per 100 square feet. Water thoroughly after application. Do not allow direct contact with plant foliage. For best results, apply Bonide's Nitrate of Soda in the spring time after the last frost. For individual plants, use 2 tablespoons per plant and incorporate into the soil around the furthest branches. Apply every 6-8 weeks throughout the growing season.

Lawns: Apply 2 lbs. (3 cups) of Bonide's Nitrate of Soda per 100 square feet. Water thoroughly after application. Apply every 6-8 weeks throughout the growing season.

This chart will give you a general application rate when used with a soil test. For more accurate application rates for your area, contact your state extension service.

Fertility Level	10 sq. ft.	100 sq. ft.
Much Below Normal	4.5 oz. (12 Tb.)	2.8 lb. (4 1/8 cups)
Slightly Below Normal	2.3 oz. (6 Tb.)	1.4 lb. (2 1/16 cups)
Normal Level (Maintenance)	1 oz. (3 Tb.)	.7 lb. (1 cup)
