Net Weight 4 LB. (1.8 kg)
Packed by weight, not volume
• Provides Soluble Nitrogen to promote abundant growth
• Promotes leaf and stem growth and dark green color of flower gardens, vegetable gardens and lawns
• Quick Release Formula
Nitrate of Soda 15-0-0

How to read a fertilizer label.

Fertilizers are rated by three numbers, such as 15-0-0. The numbers tell what percentage of primary nutrients the fertilizer contains. The first number is the percentage of Nitrogen; the second number is the percentage of Available Phosphate (P2O5); the third number is the percentage of soluble Potash (K2O).

When purchasing fertilizer, keep in mind that typically the first number, or Nitrogen, emphasizes a green color and denser foliage. The middle number, Available Phosphate, emphasizes the development of flowers, fruits or vegetables. And the third number, Soluble Potash, emphasizes overall plant hardiness and its ability to withstand stress.

DIRECTIONS FOR USE
Apply Only as Directed. Wash off any plant food which accidentally gets on foliage.

General Gardening: Thoroughly incorporate into the soil, to a depth of 4 to 5 inches, at the rate of 1.4 lb. (2 1/2 cups) per 100 square feet. Water thoroughly after application. Do not allow direct contact with plant foliage. For best results, apply Bonide’s Nitrate of Soda in the spring time after the last frost. For individual plants, use 2 tablespoons per plant and incorporate into the soil around the farthest branches. Apply every 6-8 weeks throughout the growing season.

Lawns: Apply 2 lbs. (3 cups) of Bonide’s Nitrate of Soda per 100 square feet. Water thoroughly after application. Apply every 6-8 weeks throughout the growing season.

GUARANTEED ANALYSIS:
Total Nitrogen (N) . . . . . . . . . 15.00% Nitrate Nitrogen
Plant Nutrients Derived From: Nitrate of Soda
F1290

Bonide’s Nitrate of Soda reacts quickly in the soil to rapidly provide plants with Nitrogen. Nitrogen, one of the three major plant nutrients, stimulates early spring growth, deep green color, and stem and leaf growth. Deficiencies of Nitrogen can result in stunted plant growth.
