

Optimize Your Pest Control Rotation with **OPTIMATE™ CS**

The Most **ACTIVE** Pyrethroid
In The World!

OPTIMATE™ CS contains the latest generation
Pyrethroid-Gamma Cyhalothrin

What makes it different?

Gamma Cyhalothrin is a single biologically active isomer which allows for the same strength at half the use rate of Lambda Cyhalothrins. One pint treats up to 24,000 square feet when treating for litter beetles. Plus, OPTIMATE™ CS is microencapsulated to ensure slow-release and longer residual of the active ingredient.

OPTIMATE™ CS

CONTROLLED RELEASE INSECTICIDE

- Contains 5.9% Gamma Cyhalothrin
- For control of litter beetles, fleas, flies, and other listed pests of livestock/poultry housing, pet kennels, railcars, trucks and trailers
- Effective against adults and immature Darkling beetles, Hide and Carrion beetles
- Can be reapplied at 21-day intervals
- Highly concentrated
- Micro-encapsulated formula ensures slow release
- One pint treats up to 24,000 sq ft. when treating for litter beetles
- Dilution rate of 1-2 oz per 3 gallons of water
- Can be used on entire footing, crack and crevice, or banded applications
