3. HAZARD IDENTIFICATION

NFPA Codes: Health: 1 Fire: 2 Reactivity: 0

(Degree of Hazard: 4=Extreme 3=High 2=Moderate 1=Slight 0=Insignificant)

Health Effects:
- On Skin: Irritant, may cause temporary redness. Mild local irritation and sensitization. Intensive or continuous contact with skin may cause dermatitis.
- On Eyes: Irritant, may cause burning, redness, pain.
- By Accidental Ingestion: Harmful if ingested, gastrointestinal irritation. Abdominal pain, nausea, vomiting, dizziness.
- By Inhalation: Irritant to respiratory tract, sore throat, coughing, shortness of breath, dizziness, nausea.
- By Pressure Injection: Injection of all products will cause severe internal damage if not properly treated.
- Other: Kidney damage may occur (route of exposure not reported).

4. FIRST AID MEASURES

EMERGENCY AND FIRST AID PROCEDURES:

Skin Contact: Wash affected area with copious amounts of soap and water.
Eye Contact: Remove any contact lenses at once. Flush eyes well with large quantities of water for at least 15 min. See physician immediately.
Accidental Ingestion: For small amounts, give milk of magnesia or a glass or two of water or milk. For large quantities, consult a physician.
Inhalation: If symptoms of overexposure are experienced, evacuate to fresh air. If symptoms persist, seek medical attention.
5. FIRE & EXPLOSION HAZARD DATA

Flash Point: 113 to 121°F (45 to 49°C)  
Identification No.: UN 2319

Extinguishing Media: Regular Foam, CO₂, Dry Chemical (Class B)

Flammable Limits (% by volume): Not Available

Special Fire Fighting Procedures and Equipment: Do NOT use water. As with any fire situation, full face, self-contained breathing apparatus and appropriate protective clothing should be worn. Under fire conditions, this product may release CO, CO₂, smoke, and other decomposition products of undetermined hazard, but it is NOT an oxygen donor. Water is unsuitable for use on burning material, but may be used to cool containers exposed to heat. Incompatible with strong oxidizing agents.

NFPA Codes:  
Health: 1  Fire: 2  Reactivity: 0
(Degree of Hazard: 4=Extreme  3=High  2=Moderate  1=Slight  0=Insignificant)

6. SPILL OR LEAK PROCEDURES

Steps to be Taken in Case Material is Released or Spilled: Use protective solvent resistant gloves to avoid skin contact. Small spills can be wiped up with vermiculite or other suitable absorbent material and removed to an approved disposal container. Large spills should be absorbed by dirt, sand, or other suitable absorbents for disposal. Do not hose spills down drains. Move leaking containers to well ventilated area. No Smoking. Eliminate any source of ignition. Avoid inhalation. Use NIOSH-approved respiratory protection device.

7. SPECIAL PRECAUTIONS

Handling and Storage Precautions: Store in closed containers away from heat or sources of ignition and oxidizing materials. Protect against physical damage to containers. Avoid inhalation and contact with skin and eyes.

Other Precautions: Do not dispose of solvent or oil-soaked combustible materials (rags, paper, etc.) in an open container or trash can. Place rags in approved waste cans or soak with water.

8. OCCUPATIONAL PROTECTIVE MEASURES

Respiratory Protection: Not normally needed in well ventilated areas. If vapor concentration is high, use NIOSH-approved respiratory protection device.

Ventilation: General mechanical ventilation (to reduce fumes).

Protective Gloves: Neoprene or Rubber.

Eye Protection: OSHA-approved safety glasses with side shields.

Other Protective Equipment: Eye bath and safety shower.

Work/Hygienic Practices: Good personal hygiene practices should be used. Wash after any contact, before eating, and at the end of the work period.
MEDINA ORANGE OIL

**Odor:** Pungent Orange Aroma

**Refractive Index:** 1.472 (@ 20°C)

**Evaporation Rate:** <1.0 (Ether = 1)

**Solubility in Water:** Negligible

**Heat of Combustion:** 1.471 Kcal/mol

**Surface Tension:** 25 mN m⁻¹ (@ 22°C)

10. REACTIVITY DATA

**Stability:** Stable under ordinary conditions of use and storage.

**Hazardous Decomposition Products:** Burning produces Carbon Monoxide and/or Carbon Dioxide.

**Hazardous Polymerization:** Will not occur.

**Incompatibilities:** Avoid strong oxidizing agents. Avoid exposure to sparks, heat and flames.

11. HEALTH HAZARD DATA

**Carcinogenicity:** N/A

**NTP:** TR347

**OSHA:** Combustible Liquid

**IARC:** N/A

**Signs & Symptoms of Acute & Chronic Exposure:**
- Eye, skin and mucous membrane irritation
- Inhalation and Absorption

**Primary Routes of Entry:**
- Eye, skin and upper respiratory inflammation

**Medical Conditions Aggravated:**
- Eye, skin and upper respiratory inflammation

**Acute Effects:**
- LD₅₀, Oral (rat): 4,400 mg/kg
- LD₅₀, Dermal (rabbit): >2,000 mg/kg
- LD₅₀, Dermal (mice): 5,600 to 6,600 mg/kg

**Permissible Exposure Concentration:**
- for d-Limonene Sax Quotes:
  - LPR-Mus TD₅₀ < 4800 mg/kg/8W-1: ETA
  - ORL-Mus TD₅₀ < 67 mg/kg/39W-1: ETA

**EMERGENCY AND FIRST AID PROCEDURES:**

**Skin Contact:** Wash affected area with copious amounts of soap and water.

**Eye Contact:** Remove any contact lenses at once. Flush eyes well with large quantities of water for at least 15 min. See physician immediately.

**Accidental Ingestion:** For small amounts, give milk of magnesia or a glass or two of water or milk. For large quantities, consult a physician.

**Inhalation:** If symptoms of overexposure are experienced, evacuate to fresh air. If symptoms persist, seek medical attention.

12. ECOLOGICAL INFORMATION

"Marine Pollutant: Classified as slight hazard for water WGK-1 (self statement)"
**Ecotoxicity:**  
Fish Toxicity:  
LC-0 = 26 mg/l  
LC-50 = 33 mg/l  
LC-100=43 mg/l  
Daphnia toxicity: not available  
Alga toxicity: not available  
Earthworm toxicity: not available  
Plant toxicity: not available

**Ozone Depletion Potential:**  
Zero stratospheric

**Global Warming Potential:**  
Zero

**Photodegradability:**  
Atmospheric half-life = c.a. 1 hour.  
(Note: d-Limonene, in common with other terpenes, represent a major sink for the undesirable tropospheric ozone, removing the smog-forming catalyst nitrogen oxides and consuming ozone at an increased rate at night. While the material is photoreactive, the benefits of removing ozone and nitrogen oxides outweigh the negative with hydroxyl radical)

**Biodegradability:**  
d-Limonene is a biodegradable solvent occurring in nature as the main component of peel oil.  
**100% in 28 days**

**Bio-Accumulation:**  
Not available

**Other Data:**  
Chemical oxygen demand: 2.850 gO₂/l or 3.280 gO₂/kg

---

**13. DISPOSAL CONSIDERATIONS**

**Waste Handling & Disposal Method:** Dispose of in accordance with Federal, State and Local environmental regulations. In most cases land fill or incineration would apply. There are no uniform EC regulations for the disposal of chemicals or residues. Chemical residues generally are applied as “special waste.” We recommend that you contact either the authorities in charge or approved waste companies which will advise you on how to dispose of special waste. Do not allow to enter drinking water supplier, waste water or soil without municipal authorization.

---

**14. REGULATORY STATUS**

1) FDA & FEMA list orange oil which is 95%+ d-Limonene as GRAS - Generally Regarded As Safe.  
2) NTP, OSHA, and IARC do NOT list product as carcinogenic to humans.  
3) Unused product is NOT listed by EPA as hazardous waste (40 CFR part 26 IQ).  
4) d-Limonene is NOT listed on California’s Prop. 65 toxic substance list.  
5) d-Limonene is listed on EPA’s Chemical Inventory, PL94-469; however, NOT on EPA’s CORR (Chemicals or Regulatory Rules) list, which contains those materials which pose a health or environmental risk.  
6) d-Limonene does NOT contain lead, cadmium, mercury, or hexavalent chromium or come into contact with these chemicals since it is a citrus derived by-product oil produced by steam distillation.  
7) The components of this product are included on the EPA TSCA Chemical Substance Inventory.  
8) The components of this product are included on Canada’s Domestic Substance List (DSL).

---

**15. OTHER INFORMATION**

**VOC INFORMATION:** Since orange oil is categorized as an essential oil, it is excluded from VOC regulation. However, when it is categorized as a solvent, orange oil is reportable as 95% VOC (850 grams per liter, 6.81 lbs. per gallon).

**ASTM D1364:**  
<0.1% Water  
**EPA 24 DENSITY:**  
0.8422 Kg/L Density
The information contained herein is based on data considered to be accurate and reliable. No warranty is expressed or implied regarding the accuracy or correctness of this data. It is the user’s obligation to determine the safe use of the product since conditions of use, handling, storage and disposal are beyond our control.
