## Pet Lac Powder Milk Food

### *Milk Food Specially Formulated For All Pets*

Recommended as a complete food source for orphaned or rejected animals or those nursing, but needing supplemental feeding. Also recommended for growing or adult animals that are stressed and require a source of highly digestible nutrients.

- Provides essential protein, carbohydrate and caloric content similar to mother's milk.
- Supplies necessary vitamins and minerals to ensure proper development and growth
- Easy to digest, easy to mix formula that smells and tastes great.
- Ideal supplement for post-surgery and convalescence.

**MIXING DIRECTIONS:** Gently shake or stir one part of powdered Pet Lac into two parts of warm water. A part is any measuring device you use: teaspoon, tablespoon or cup. Do not use a blender.

**DIRECTIONS FOR USE:** All animals should receive their mother's milk for at least 2 days, if possible. The colostrum milk gives extra nutrition and temporary immunity against some diseases. **Reconstituted Pet Lac should be fed at room temperature. Reconstituted Pet Lac may be fed at the daily rate of 1 tablespoon (15 mL) per 2 ounces (57 g) body weight. The daily feeding rate should be divided into equal portions for each feeding.**

Animals' needs will vary and this amount may have to be increased or decreased, depending on the individual. Larger animals do well when fed reconstituted Pet Lac every 8 hours. Small or weak animals may need to be fed reconstituted amounts every 3 or 4 hours. Weigh the animal 3 times a week to assure adequate feeding.

**Consult your veterinarian for advice.**

**Not for human consumption**

When a food supplement is desired, for growing animals or for supplementing large litters, old, or convalescent animals, Pet Lac Powder should be used at the rate of 1 teaspoonful per 5 lbs. (2.2 kg) body weight.

**PREGNANT AND LACTATING MOTHERS:** Mix Pet Lac Powder into the daily ration at the rate of 2 tablespoons per 5 lbs. (2.2 kg) body weight until 2 weeks after whelping.

Pet Lac Powder should be refrigerated after opening. Discard unused portion after one month.
