

Flea Fixer

Safe for Children and Pets

Pet Peeve™ Flea Fixer™ contains natural insecticidal essential oils on an amorphous silica gel base to kill fleas, ticks and lice.

The natural essential oils in Pet Peeve Flea Fixer™ are produced by plants to help protect them from insect attack. This natural technology is now harnessed to kill pests on your pet and in your home. Control is provided the way Mother Nature intended, while leaving you and your pets free from exposure to harsh synthetic chemicals.

Directions For Use

To kill fleas, ticks, and lice on animals, Flea Fixer™ should be dusted over the entire body, and massaged into fur, and around feet, pads and between toes. Care should be taken not to get Flea Fixer™ in the pet's eyes, nose, and mouth or on genitals. If an animal's coat or skin becomes too dry from over dusting, the pet should be thoroughly bathed with Pet Peeve™ Pup Wash™ by Eco Treat™ Products before reapplying. Bedding, kennels, sleeping areas, carpeting, and furniture used by infested animals and cracks where pests may hide can also be dusted at a rate of 1-2 oz per 100 square feet. Flea Fixer™ may also be applied as a liquid spray. To make a spray, mix Flea Fixer™ with water at a rate of 4 oz per quart. One quart of solution will treat 200-400 square feet. Do not make more solution than can be used in one application. Shake frequently while spraying. The spray will dry to leave a fine layer of powder. A veterinarian should be consulted before using Flea Fixer™ on animals with skin conditions. Some pets may be sensitive to essential oils. If in doubt, treat a small area first and wait 24 hours for any negative reaction. In case of any reaction, wash area with water and a mild soap or shampoo and contact your veterinarian for any persistent irritation.

Common Sense Precautions

Do not apply to food or direct food contact surfaces. Avoid directly breathing dust. Do not allow children to apply product. If more than an incidental amount is swallowed, seek medical attention. Give one glass of water and do not induce vomiting. Wash hands well after use and before eating or smoking. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Store out of reach of children and in a closed, appropriately labeled container between 35 and 95 °F.

This product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b).
