Jefferson and Malheur counties in  
the State of Oregon

Group **1** Herbicide

## FIFRA Sec. 24(c) Special Local Need Label

# Poast<sup>®</sup>

herbicide

The purpose of this FIFRA Section 24(c) registration is to allow for the control of  
**Glyphosate-Tolerant Creeping Bentgrass in dry irrigation canals and drainage ditches.**  
**Glyphosate-Tolerant Creeping Bentgrass is a USDA-APHIS regulated article.**

This label is valid until December 31, 2021, or until otherwise amended, withdrawn, canceled, or suspended.

### Active Ingredient:

sethoxydim: 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one\* ..... 18.0%

**Other Ingredients:** ..... 82.0%

**Total:** ..... 100.0%

\* Equivalent to 1.5 pounds of sethoxydim per gallon formulated as an emulsifiable concentrate

Contains petroleum distillates

**EPA Reg. No. 7969-58**

**EPA SLN No. OR-110004**

### Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Read the label affixed to the container for **Poast<sup>®</sup> herbicide**, EPA Reg. No. 7969-58, and this Section 24(c) label before applying. **DO NOT** use in a manner inconsistent with applicable directions, restrictions, and precautions provided on the label affixed to the container for **Poast** and this Section 24(c) label. Use of **Poast** according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for **Poast**.

### Restrictions and Limitations

- **DO NOT** spray across canals or ditches. Treat the banks of the canal above the normal waterline; this will reduce the potential of herbicide reaching the lower interior of the canal. To prevent injury or illegal pesticide residue levels in irrigated crops, it is important to prevent herbicide-treated soil/plants from being in contact with water used to irrigate crops.
- Although this product is not a Restricted Use Pesticide, all applications under this Section 24(c) registration must be conducted by a licensed pesticide applicator.

- Under OR-110004, **DO NOT** apply to any other site, pest (glyphosate-tolerant creeping bentgrass is the pest), or by any other method of application not stated on this label. For use sites not indicated on OR-110004, follow the directions and limitations provided on the Section 3 or other Section 24(c) labels for **Poast**.
- Apply when irrigation canals are dry, drained, and not in use. Water may pool in localized areas of drained canals during the winter time, or other periods of non-use; the banks of these canals can be treated if the standing water is not used for irrigation purposes and/or water will not be introduced into the canal for 21 days.
- Apply when drainage ditches are dry. Water may pool in localized areas of ditches during the winter time; the banks of these ditches can be treated if water is not being used for other purposes.
- **DO NOT** apply **Poast** to irrigation canals/ditches unless a 21-day withholding period can be observed. The withholding period is the period of time before water can be introduced into an irrigation canal/ditch.
- **DO NOT** apply if rainfall is expected within one hour following application.
- **DO NOT** apply by aircraft.
- **DO NOT** apply to water.
- **DO NOT** allow herbicide to run off-site.
- **Chemigation. DO NOT** apply this product through any type of irrigation system.

## Application Instructions

### Broadcast Applications

**Poast® herbicide** can be used for control of creeping bentgrass (including glyphosate-tolerant biotypes) in dry drainage ditches and dry irrigation canals. **Poast** can also be applied to noncrop areas immediately adjacent to treated ditches and canals. Apply to creeping bentgrass that is actively growing. Bentgrass should not be under stress from lack of water, excessive water, mowing shock, excessive hot or cold temperatures, or injury from other herbicide applications. Apply **Poast** at 2.5 pints per acre along with spray additives [methylated seed oil (MSO) or crop oil concentrate (COC) plus nitrogen source] as directed in the **Poast Broadcast Applications** table below. To improve control, a sequential application at 1.5 to 2.5 pints per acre approximately 3 weeks after the initial application may be necessary. Use sufficient spray volume (10 to 20 gpa) to provide proper spray coverage. Use flat fan or hollow cone nozzles. **DO NOT** use flood, whirl chamber, or controlled droplet applicator (CDA) nozzles because erratic coverage can cause inconsistent weed control. Regrowth may occur because of growth stage of the weed or environmental conditions. For well-established creeping bentgrass, repeat applications may be necessary. Monitor treated plants for regrowth.

### Poast Broadcast Applications

Weed Species	Ideal Target Weed Size (inches)	Use Rate per Application (pts/A)	Spray Additives	Maximum Number of Applications per Year	Maximum Rate per Year (pts/A)
Glyphosate-tolerant creeping bentgrass ( <i>Agrostis stolonifera</i> )	2 to 6	Initial application 2.5  Sequential application 1.5 to 2.5	MSO or COC at 1% volume/volume (v/v) <b>plus</b> AMS at 2.5 lbs/A <b>or</b> UAN @ 4.0 to 8.0 pts/A	3	7.5

### Spot Spray Applications

Spot spray applications of **Poast** may be used to control creeping bentgrass according to the directions in the table below. For best results, apply on a spray-to-wet basis. Make applications of spray mixture directly on glyphosate-tolerant creeping bentgrass. A follow-up application (approximately 3 weeks after initial treatment) may be necessary to improve control. Regrowth may occur because of growth stage of the weed or environmental conditions. For well-established creeping bentgrass, repeat applications may be necessary. Monitor treated plants for regrowth.

### Poast Spot Spray Applications

Weed Species	Concentration in Spray Solution	
	Poast	COC or MSO
Glyphosate-tolerant creeping bentgrass ( <i>Agrostis stolonifera</i> )	1.5 % solution	1.0%

### Spot Treatment Dilution

Spray Solution Volume (gallons)	Amount of Product to be Added	
	Poast (1.5%)	COC or MSO (1.0%)
1	1.9 fl ozs	1.3 fl ozs
3	5.8 fl ozs	3.8 fl ozs
5	9.6 fl ozs	6.4 fl ozs
25	3.0 pints	2.0 pints
50	6.0 pints	4.0 pints

2 tablespoons = 1 fluid ounce

## Conditions of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.**

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND BASF'S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.**

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.**

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
