Pro Care® Water Soluble Plant Food completely dissolves when mixed with water. This allows the TREES BHRUBS plant to absorb nutrients through the leaves and roots to promote quick results and plant growth.

FOR USE ON:

ROSES

DIRECTIONS FOR USE

INDOOR PLANTS

Mix 1 teaspoon per 1 gallon of water and apply every 2 weeks. For steady feeding mix 3/4 teaspoon of ProCare® All Purpose Water Soluble Plant Food with 1 gallon of water and apply every time plants need water.

OUTDOOR PLANTS

Mix 1 tablespoon per gallon of water and apply over leaves and stem. Soak the soil as far as the plant branches extend (dripline). One gallon should cover approximately 10 square feet. Apply ProCare® Water Soluble Plant Food every 2 weeks.

FOR BEST RESULTS

Apply with a clean sprinkling can, pail or garden feeder for larger areas. Feed plants anytime, preferably in the morning. Avoid watering the foliage in the evening to minimize the risk of plant disease. Water plants regularly between feedings. Always stop feeding plants 3 to 4 weeks before the first frost.

TRANSPLANTING

6.218"

To help reduce transplant shock, apply at half-strength after planting. EASY HOSE-END FEED DIRECTIONS

Pour product into the feeder jar. The feeder automatically dispenses just the right amount of food as you water. Apply every 7 to 14 days.

KEEP OUT OF REACH OF CHILDREN

GUARANTEED ANALYSIS 0.06% Water Soluble Zinc (Zn)

Potassium Phosphate, Potassium Chloride. Potassidi i Fronzishate, Potassidi Triloride, Urea, Urea Phosphate, Boric Acid, Copper Sulfate, Iron EDTA, Manganese EDTA, Sodium Molybdate, and Zinc Sulfate.
