

Prescription Treatment® brand

# ProCitra-DL™

Contains d-Limonene – a Botanical Insecticide

Whitmire Micro-Gen introduces ProCitra-DL, a professional use contact aerosol that contains no synthetically engineered active ingredients. d-Limonene, ProCitra-DL's active ingredient, comes directly from oranges and other citrus peels making it useful for any sensitive account.

ProCitra-DL, part of Whitmire Micro-Gen's line of environmentally friendly pest management products, is a botanical-based insecticide ideal for Crack & Crevice® and spot treatment in both food and non-food handling areas. It controls a wide variety of pests including ants, cockroaches, fleas and spiders and may be used in sensitive accounts such as schools, nursing homes, food processing plants, hospitals and government buildings.

d-Limonene is an organic chemical found in citrus and other fruits, vegetables, meats and spices and is used as an additive in a variety of foods, beverages, soaps and perfumes. It is naturally occurring, has low mammalian toxicity and is recognized as safe by the FDA.

## Benefits
