INCREDIBLE RESULTS

Eastern Red Cedar 1-2 pellets per stem diameter

Species controlled include but are not limited to;

Alder	Hickory	Snowbrush
Ash	Huisache	SoapweedYucca
Aspen	Juniper	(Yucca Glacua)
Balsam Poplar	Locust	Sourwood
Birch	Lotebrush	Sumac
Black Cherry	Manzanita	Sweetbay
Blackgum	Mesquite	Sweetgum
Catclaw	Mulberry	Tallow
(Acacia)	Multiflora Rose	Whitebrush
Cedar	Myrtle	Whitethorn
Deerbrush	Oaks	Wild Cherry
Dogwood	Osage Orange	Wild Plum
Elm	Persimmon	Willow
Hackberry	Privet	Yaupon
Hawthorn	Red Maple	Yellow Poplar
Hazel	Smutgrass	

PRONONE® POWER PELLET HERBICIDE is a pellet of Hexazinone, **proven to be effective** for brush control in reforestation areas, rangeland, pastures and non-cropland areas.

PRONONE® POWER PELLET is a registered trademark of Pro-Serve, Inc.

HOW TO USE

- Apply prior to or during periods of active growth (early spring to early summer).
- Moisture/rainfall is required to activate PRONONE POWER PELLETS in the soil and carry the active ingredient into the ground where it is absorbed by the plant's root system. Best results are obtained when the soil is moist at time of application. Results will occur 3-6 weeks after ¼ to ½ inch of rainfall. *Product remains active even after extended periods of no rainfall.*
- Do not mow or cut treated plants until they have completely defoliated at least once, or in the case of cedar, have turned completely brown.
- On soils high in clay and/or organic matter, use the higher rates.

SINGLE STEM PLANTS: For plants with a single stem or trunk such as Oak, Elm and Cedar apply 1-2 pellets for every inch of stem diameter. When more than one pellet is needed, distribute the pellets uniformly around the stem out approximately half way between the stem and canopy edge.

MULTI-STEMMED PLANTS: For multi-stemmed plants such as Mesquite, Huisache and Multiflora Rose that are 2ft to 3ft tall, apply 1-2 pellets at the base of the plant. For plants 3ft to 6ft tall, apply 2-4 pellets at the base of the plant. For Red Berry Cedar (Juniper) apply 1-2 pellets for every 3ft of plant height or every 3ft of canopy diameter, whichever is greater. Apply pellets uniformly around the plant approximately halfway between the plant's stem and canopy edge.

FENCE LINE TREE AND BRUSH CONTROL: For the control of trees and brush in Pasture and Rangeland fences, apply 1 pellet in the fence line for every 3ft of fence length. For heavy infestations, double the rate to 1 pellet for every 1.5 ft of fence length.

LITTLE TO NO REGROWTH*

**NO SPECIAL APPLICATOR
LICENSE REQUIRED**

NO SPRAY DRIFT

**NO SPECIAL EQUIPMENT OR
CLEANUP NEEDED**

**NO GRAZING OR HAY
CUTTING RESTRICTIONS***

**VERY LITTLE DAMAGE TO
HERBACEOUS VEGETATION**

**This little pellet packs a
POWERFUL punch!**

* when used according to instructions at label rates

Available in a range of sizes to meet your toughest challenges

5.5 lb. 3,900* pellets

22 oz. 975* pellets

**3 oz. 130* pellets
Childproof cap**

Power Pellets are also available in a 35 lb. container with 24,810* pellets (*pellet counts are approximate)

USE PRECAUTIONS - Injury or loss to desirable trees or other plants may result from failure to observe the following: Do not apply, drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts or similar areas. Prevent contact with desirable plants. Keep from contact with fertilizers, insecticides, fungicides and seeds. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Always read and follow label instructions.

Fence Row - 1 year after treatment
1 pellet every 3 feet on both sides of fence

Multiflora Rose - 1 year after treatment
1-2 pellets on plants 2ft. to 4ft. tall
