

“I’ve been spraying ProStar wholesale on my fairways in the Fall and Spring the past two years and they have been zoysia patch free. In the rare occasions that there have been active large brown patches in zoysia, I’ve used a special tank mix of ProStar, urea and green dye – using the spray gun on my rig to drench the turf. It has worked so well that I have other superintendents doing the same.”

Jim Naudet, Golf Course Superintendent,
Leawood South Country Club, Leawood, Kansas

Turf Disease		ProStar® Application Chart	
		Use Rate (oz per 1,000 ft²)	Application Interval (Days)
Brown patch	Preventive	1.5 – 2.2	14 – 21 Days
	Curative	3.0	14
Fairy ring	Preventive	2.2	21 – 28 Days
	Curative	4.5	30
Red thread/Pink patch Yellow patch/Southern blight		1.5	21 – 28
Gray snow mold		3.0 – 4.5	Before permanent snow cover
Large brown patch		2.2	30

WHAT IT IS.

Locally systemic fungicide for turfgrass.

WHAT IT GIVES YOU.

It’s one of the few fungicides that control both fairy ring and brown patch—not to mention, six more common turf diseases. Especially effective on basidiomycete fungi and a broad spectrum of Rhizoctonia species.

WHY IT BEATS THE COMPETITION.

- Industry standard, most consistent performer on fairy ring
- Longer residual than contact fungicides
- Unique mode of action provides excellent resistance management

HOW IT MAKES YOUR JOB EASIER.

- Provides preventive and curative control of both brown patch and fairy ring
- Excellent turf safety for virtually all cool and warm season turfgrasses

RELAX. YOU’RE BACKED BY BAYER.

Training. Troubleshooting. Innovating. Count on us to stand behind you now and for years to come. Get science and support at BackedByBayer.com or 1-800-331-2867.

ProStar®

THE SCIENCE OF PROSTAR® FUNGICIDE.

It's preventive, it's curative, and it's locally systemic. ProStar® doesn't regulate turf growth and won't interfere with PGR programs.

ProStar fungicide is in control.

- Fairy ring
- Brown patch
- Large brown patch (of zoysiagrass)
- Red thread
- Southern blight
- Yellow patch
- Pink patch
- Gray snow mold

Frequently asked questions.

- >Q Is ProStar fungicide economical?
 >A Yes. Its long residual makes a big difference. Instead of spraying every 14 days, you get up to 21 days preventive protection against brown patch and up to 28 against other diseases such as fairy ring.
- >Q Does ProStar fungicide control localized dry spot?
 >A Yes, it controls the fungi associated with localized dry spot.

THE SCIENCE OF YOUR PROFESSION.

Every ounce of ProStar is Backed by Bayer, and all the science and support you need to get the job done right. That's what you should expect from an industry leader.

Our staff is your staff.

No one invests as much in product development as Bayer. Our scientists' expertise in chemistry and formulation technology is unrivaled around the world. Our field sales and technical representatives are always ready to help you. You'll find them, along with additional information, 24 hours a day, 7 days a week at BackedByBayer.com.

Product support year round.

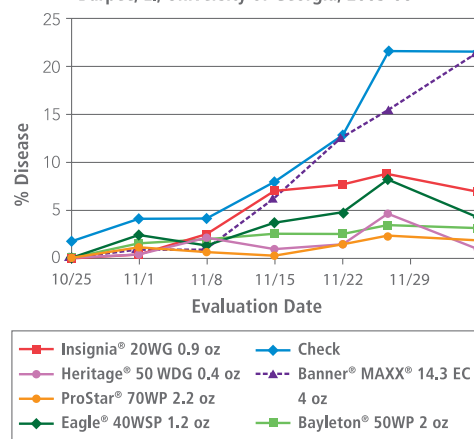

We'll help you diagnose problems, troubleshoot issues, and get every product benefit you expect—and even some you don't. We also offer interactive training throughout the year, to help grow your business and your success.

Complete satisfaction guarantee.

Bayer guarantees your satisfaction, after all, your success is our success.
