ACTIVE INGREDIENT:
Dimethylamine salt of quinclorac; 3,7-dichloro-8-quinolinecarboxylic acid .................................................. 18.92%
OTHER INGREDIENTS:........................................................................................................................................ 81.08%
EPA Reg. No.: 89442-12 Total .......................................................... 100.00%
Equivalent to: 1.50 lbs. quinclorac: 3,7-dichloro-8-quinolinecarboxylic acid equivalent per gallon.

GROUP 4 HERBICIDE

KEEP OUT OF REACH OF CHILDREN

CAUTION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

See inside for complete First Aid, Precautionary Statements, Directions for Use, Conditions of Sale and Warranty, and state-specific crop and/or use site restrictions.

HERBICIDE

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION. Harmful if swallowed.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemically resistant to this product are listed below. For more options, refer to Category A on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:

• Long-sleeved shirt and long pants
• Chemical-resistant gloves, such as butyl rubber > 14 mils, or natural rubber > 14 mils, or neoprene rubber > 14 mils, or nitrile rubber > 14 mils
• Shoes plus socks

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENGINEERING CONTROLS STATEMENT

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

ENVIRONMENTAL HAZARDS

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

DO NOT apply directly to water, areas where surface water is present, or to intertidal areas below the mean high water mark.

DO NOT contaminate water by cleaning of equipment or disposal of rinsate.

DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

DO NOT discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with this labeling. For use only by certified commercial applicators, or persons under their direct supervision, and only for those uses covered by the certified applicator's certification. All applicable directions, restrictions, and precautions are to be followed. This labeling must be in the possession of the user at time of application.

DO NOT apply this product by air or through any type of irrigation equipment. Prime Source, LLC does not recommend or authorize the use of this product in manufacturing, processing or preparing custom blends with other products for application to turf.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the specified area during application.

For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, and water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material (such as nitrile, butyl, neoprene, and/or barrier laminate)
- Shoes plus socks

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, nurseries, or greenhouses.

Professional applications to residential and nonresidential turf are not within the scope of the Worker Protection Standard.

DO NOT enter or allow others to enter the treated area until sprays have dried.
STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: DO NOT store box under dampness or high humidity.

CONTAINER DISPOSAL: Nonrefillable Container. DO NOT reuse or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying; then offer for recycling, if available, or reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

QUINCLORAC 1.5L HERBICIDE

This product is manufactured by:
Prime Source, LLC
4609 E. Boonville-New Harmony Road
Evansville, IN 47725
Resistance Management

Always refer to the actual package for complete label verbiage. This product may not yet be available or approved for sale or use in your area.

Application Information

Apply Quinclorac 1.5L Select d.

Do not exceed the labeled application rate or fail to comply with use restrictions listed in Quinclorac 1.5L Select USE RESTRICTIONS.

For best results, weeds should not be under stress from lack of water, excessive water, low fertility, mowing shock, excessive hot or cold temperatures, or injury from other herbicide applications.

Quinclorac 1.5L Select can be tank mixed with Pendulum® herbicide or Pre-M® herbicide to provide residual control of annual grasses. Consult the respective tank mix labels for additional weeds controlled.

Seeding/Overseeding/Sprigging:

The use of Quinclorac 1.5L Select before or after seeding or overseeding a turf area will not significantly interfere with the turf grass seed germination and growth of those grass types identified as tolerant or moderately tolerant in Table 1. Consult Table 4 for timing of applications concerning any seeding, overseeding or sprigging situation.

<tr>
<td>Methylated seed oil</td>
<td>Preferred adjuvant for post-emergence applications.</td>
</tr>
<tr>
<td>Crop oil concentrate</td>
<td>High-quality surfactant for use when MSO is not available.</td>
</tr>
</tbody>
</table>

Additive Use Rates and Directions:
- **Methylated seed oil or crop oil concentrate** used as the adjuvant with Quinclorac 1.5L Select herbicide must meet all the following criteria:
  - Nonphytotoxic
  - Contain only EPA-exempt ingredients
  - Provide good mixing quality in the jar test
  - Successful in local experience

The exact composition of suitable products will vary; however, any methylated seed oil or crop oil concentrate used should contain emulsifiers to provide good mixing quality.

When an adjuvant (or a specific adjuvant product, such as a drift control agent) is to be used with this product, the use of a Chemical Producers and Distributors Association (CPDA) certified adjuvant is recommended.

Consult your local Prime Source, LLC representative or distributor for instructions for your area.

MIXING INSTRUCTIONS FOR QUINCLORAC 1.5L SELECT

2. Agitation: Maintain constant agitation throughout mixing and application.
3. Inductor: If an inductor is used, rinse it thoroughly after each component has been added.
4. Water-dispersible products (dry flowables, wettable powders, suspension concentrates, or suspo-emulsions).
5. Water-soluble products (such as Quinclorac 1.5L Select).
6. Emulsifiable concentrates (such as methylated seed oil or crop oil concentrate).
7. Water-soluble additives (such as chelated iron or soluble nitrogen fertilizer when applicable; not all chelated iron or sprayable nitrogen fertilizers are compatible with Quinclorac 1.5L Select. Always perform a compatibility test to ensure proper mixing. See Compatibility Test for Mix Components section of label for directions.)
8. Remaining quantity of water.

Maintain constant agitation during application.

Backpack Sprayer:
- Begin with a clean spray tank.
- Fill the spray tank 1/2 full with clean water and add the required amount of Quinclorac 1.5L Select.
- Cap sprayer and agitate to ensure mixing.
- Uncap sprayer and add appropriate amount of methylated seed oil.
- Cap sprayer and agitate.
- If the mixture is allowed to settle for any period of time, thorough agitation is essential before spraying is resumed.
SPRAYING INSTRUCTIONS FOR QUINCLORAC 1.5L

7: Apply with properly calibrated ground equipment in sufficient water per acre to provide uniform spray distribution (at least 20 gallons of water per acre or at least 0.5 gallon per 1,000 sq. ft.). Use low pressure sprayers at 20 to 40 psi. Maintain continuous agitation during spraying with good mechanical or bypass agitation. Nozzle screens must be no finer than 50 mesh (100 mesh is finer than 50 mesh). Check sprayer routinely to determine proper calibration. Flat fan, flood or cone nozzles may be used. Nozzles should be arranged to obtain uniform coverage for turf and weeds to be controlled. Boom height, nozzle selection, and pressure should be adjusted to provide uniform coverage and minimize spray drift.

Avoid overlaps that will increase rates above those labeled for use. Avoid application when winds may cause drift.

Clean spray application equipment thoroughly using a strong detergent or commercial sprayer cleaner according to the manufacturer’s directions before and after applying this product.

COMPATIBILITY TEST FOR MIX COMPONENTS

1) Add components in the following sequence using 2 teaspoons for each pound or 1 teaspoon for each pint of labeled rate per acre.

- Water – For 20 gallons per acre spray volume, use 3.3 cups (800 ml) of water. For other spray volumes, adjust rates accordingly. Use only water from the intended source at the source temperature.

- Products in PVA bags – Cut an opening in the water-soluble PVA bag just large enough to use a teaspoon for measuring purposes. Use the opened, water-soluble PVA bag first when preparing spray solution. Boron-containing fertilizers can be incompatible with PVA material. Include PVA material if a boron fertilizer is intended to be used. Cap the jar and invert 10 cycles.

- Water-dispersible products (dry flowables, wettable powders, suspension concentrates, or suspo-emulsions) – Cap the jar and invert 10 cycles.

- Water-soluble products (Quinclorac 1.5L Select) – Cap the jar and invert 10 cycles.

- Emulsifiable concentrates (methylated seed oil) – Cap the jar and invert 10 cycles.

- Water-soluble additives – Cap the jar and invert 10 cycles.

- Let the solution stand for 15 minutes.

- Evaluate the solution for uniformity and stability. The spray solution should not have free oil on the surface nor thick (clabbered) texture. For WG or WP products, a fine precipitate that is easily resuspended is normal; large, nondispersible particles (>300 microns) that precipitate on standing are a sign of tank mix incompatibility. DO NOT use any spray solution that could clog spray nozzles.

QUINCLORAC 1.5L SELECT USE PRECAUTIONS

- Use a lawn-type sprayer with coarse spray as wind drift is less likely.

- Avoid mist and spray onto vegetables, flowers, ornamentals, shrubs, trees, and other desirable plants, especially plants belonging to the Solanaceae family, such as tomatoes, eggplants, and bell peppers.

QUINCLORAC 1.5L SELECT USE RESTRICTIONS

- DO NOT apply more than 128 fluid ounces of Quinclorac 1.5L Select herbicide per acre (or 2.9 fl. oz. per 1,000 sq. ft.) in one year (1.4 lbs. ae per acre per year).

- DO NOT use clippings as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.

- DO NOT plant eggplants or tobacco within 12 months to areas treated with Quinclorac 1.5L Select.

- DO NOT plant tomatoes or carrots within 24 months to areas treated with Quinclorac 1.5L Select.

- Apply when wind speed is less than 10 mph as drift may cause damage or death of nontarget area vegetation. DO NOT apply when conditions favor drift from target area.

- DO NOT discard rinsate on or near desirable plants.

- DO NOT apply through any type of irrigation system.

- DO NOT use to formulate or reformulate any other pesticide product that is not registered by EPA.

- DO NOT apply to golf course collars or greens.

- DO NOT apply to fine fescue unless it is part of a seed blend.
This information is for promotional purposes only. Space considerations may require information to be omitted. Always refer to the actual package for complete label verbiage. This product may not yet be available or approved for sale or use in your area.

QUINCLORAC 1.5L
SELECT™
HERBICIDE

I DO NOT apply in New York state except by spot treatment only.
I DO NOT apply to Bahiagrass, carpetgrass, St. Augustinegrass, centipedegrass, dichondra, or lawns or turf where desirable clovers are present.
I DO NOT apply to exposed feeder roots of trees or ornamental species.
I DO NOT apply into any ornamental bed.
I DO NOT apply Quinclorac 1.5L Select prior to and within 2 weeks after seeding seashore paspalum.

TURFGRASS TANK MIXES

Read and follow the applicable Quinclorac 1.5L Select USE PRECAUTIONS and USE PRECAUTIONS on all products involved in tank mixing.

For extended residual control, apply Quinclorac 1.5L Select with Pendulum® herbicide or PRE-M® herbicide.

For sedge control, applications of Quinclorac 1.5L Select with Basagran® (see Application Information and Addition of Adjuvants) or Image® 70 DG herbicide, Lescogran® herbicide, or MSMA may be made. Combinations with MSMA will aid in control of certain grassy weeds, such as Bahiagrass or kikuyugrass. Consult labels for turfgrass tolerance when tank mixing. Separate applications should be made if all target weeds are not at the correct growth stage for treatment at the same time.

Physical incompatibility, reduced weed control, or turf injury may result from mixing Quinclorac 1.5L Select with other pesticides (fungicides, herbicides, insecticides, or miticides), additives, or fertilizers.

---

1Under certain conditions, application of Quinclorac 1.5L Select + methylated seed oil are applied either before second tiller or as weed grasses mature.

4 Biotypes of large and smooth crabgrass in California have shown varied response to Quinclorac 1.5L Select. If control failure occurs following a full or split application, DO NOT reapply Quinclorac 1.5L Select. Change to a herbicide with a different mode of action.

5 NOT FOR USE to control this weed in California.

HERBICIDE

CONDITIONS OF SALE AND WARRANTY

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of Prime Source, LLC or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

Prime Source, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

To the extent consistent with applicable law, Prime Source, LLC makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty.

To the extent consistent with applicable law, Buyer's exclusive remedy and Prime Source, LLC's exclusive liability, whether in contract, tort, negligence, strict liability, or otherwise, shall be limited to repayment of the purchase price of the product.

To the extent consistent with applicable law, Prime Source, LLC and the Seller disclaim any liability for consequential, special or indirect damages resulting from the use or handling of this product.

Prime Source, LLC and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of Prime Source, LLC.
