Dependable post-emergent control of both broadleaf and grassy weeds in a wide variety of turf species from residential and commercial to golf courses, sports fields and sod farms.

- Long-lasting control of weeds and grasses - from one month up to 90 days
- Excellent control of crabgrass, even in its mature stages
- Eliminates a broad spectrum of broadleaf and grassy weeds without harming turf
- Application and seeding flexibility - ideal for seeding and overseeding before or after application

**Formulation**  
75% a.i. dry flowable

**Active Ingredient**  
Quinclorac

**Competitive Brand**  
BASF Drive®

**Packaging**  
6 x 1 lb (30 cases/pallet)

**Application Rates**  
See label for specific uses and rates

**Mode of Action**  
Absorbed by roots and foliage, active ingredient translocates to interfere with plant growth and cellulose production, which quickly causes plants to die

**Signal Word**  
Caution
