

Built for Durability. Trusted for Effectiveness.

The EZ Secured® rodent bait station is built to adapt to its environment and withstand whatever nature throws its way. Constructed with VM Products' patented process using lag screws and flexible fastening cones, the station and block lock together for simple shipment and movement. Drains placed throughout the station keep bait dry. Use EZ Secured® for an unmatched level of durability and maximized performance. 100% American made.

The external concrete block creates friction to keep station in place and raises it above ground level to prevent flooding.

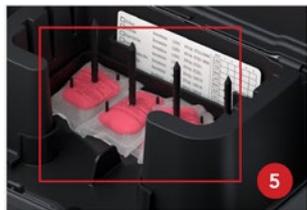

Low-profile design.

Comes standard with removable EZ Service Tray to make servicing quick and easy.

Accommodates four pieces of block bait.

Allows for eight soft bait placements, with three puncture points to make it harder for rodents to remove bait.

Accommodates the APNG-621 snap trap.

Drain holes throughout lid and base keep water draining out of station and away from bait.

Internal half-moon-shaped walls give high-level durability to the station and keep water out of the baiting area.

9
Raised lip around the front of the station deters unwanted entry.

10
Durable hinge design and spring-loaded locking mechanisms provide extended servicing reliability.

11
Durable dual wall structure gives added strength.

12
Barcode attached to lid provides a permanent inspection point, allowing for easy scanning, mapping, and logging as part of IPM field solutions.

13
Station has built-in slot to hold documentation cards.

14
Uses VM Products Universal Key.
