

Replacement Fly Glue Boards

**OUR REPLACEMENT FLY GLUE BOARDS
FIT 90% OF THE UV LIGHTED FLY TRAPS ON THE MARKET**

Type "A"

Type "B"

White - No Print

"A" FLY BOARDS

FOR USE IN: VECTOR CLASSIC, VECTOR NOVA
VECTOR PLASMA, VECTOR PLASMA ONE

BOARD SIZE: 16.25" x 9.0625"

ITEM#	PACKAGING:	WT:
#61-GFGB-A-425	4 x 25PK (100/BX)	14 LB
#61-GFGB-A-100	BULK 100 (100/BX)	14 LB

"B" FLY BOARDS

FOR USE IN: MANTIS 1x2, 1x3, VECTOR CLASSIC,
NOVA, ECLIPSE, PLASMA, GILBERT 200GT,
GARDNER WS-85, GARDNER GT180 SLIMLINE

BOARD SIZE: 16.6875" x 9.08"

ITEM#	PACKAGING:	WT:
#61-GFGB-B-425	4 x 25PK (100/BX)	14 LB
#61-GFGB-B-100	BULK 100 (100/BX)	14 LB

WHITE FLY BOARDS

BOARD SIZE: 16.875" x 4.875"

ITEM#	PACKAGING:	WT:
#61-PP-43417100	BULK 100 (100/BX)	8 LB

* FEATURES & BENEFITS *

* POLYURETHANE COATING ADVANTAGES

Creates an ultraviolet-stable fly glue board. This makes our fly boards moisture resistant so they do not warp. Protects glue from absorption by the board, keeping the quality of the glue consistent over a longer period of time.

* MORE ATTRACTIVE LANDING SURFACE FOR FLIES

Both type A & B Fly Boards have a matt (dull) finish which creates a strong contrast between the black surface & the *extra-thick white grid lines*. This contrast is a more attractive area for the fly to land. Our *extra-thick white grid lines* give the board a "wow" effect when the UV light hits the white lines. Competing fly boards have a glossy finish which makes the UV light scatter, reducing the attractiveness of UV light.

* REDUCES LABOR

Heavy stock board is used so fly boards are not flimsy. This reduces the occurrence of accidentally sticking to UV bulbs when boards are being installed or replaced.

* ECONOMICAL

Bulk, no frills packaging costs less.
