Packed by weight, not volume

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Shake bottle, lift spout, squeeze bottle to spray under appliances, sinks, furniture, around drains, along all sides of closet shelves, under shelf paper, on ledges, wherever roaches develop paths. Be sure to treat basements, attics and garages.

2. Tap a line of powder in every drawer, around sides and backs of all cabinets and storage shelves. In cracks and crevices behind sinks and toilets. Also treat behind all office furniture and particularly in file drawers. One pound normally treats an average home of 2,000 square feet. New construction treatment in walls requires one pound for every 500 square feet.

For best results, Bonide Boric Acid Roach Powder should be used in every room of a building and applied in every place indicated.

HOW DOES BONIDE BORIC ACID ROACH POWDER WORK?

Since Bonide Boric Acid Roach Powder is non-repellent roaches do not avoid it. When they get near it, the electro-static charged powder clings and is carted back to their nests.

BONIDE BORIC ACID ROACH POWDER WILL ALSO CONTROL INFESTATIONS OF SILVERFISH, ANTS, PALMETTOS, WATER BUGS.

Keep powder dry. If it gets wet, remove and re-apply, to guard against future infestations. Any powder visible after applications must be brushed into cracks and crevices or removed. Apply only in areas inaccessible to children and pets. Do not use in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of feed and feedstuffs.
