FOR BEST RESULTS

- If lawn needs watering, water thoroughly 24 hours before application.
- Do not cut grass 1 to 2 days after application.
- Do not apply when temperatures exceed 85°F.
- De necesitarlo, riegue bien el césped 24 horas antes de aplicar el producto.
- No corte el césped sino hasta 1 o 2 días después de la aplicación.
- No aplique el producto cuando la temperatura exceda los 29°C.

HOW TO APPLY

- This bottle applies 1.35 lb of product per 1,000 sq ft.
- Shake well before using. Connect sprayer to hose. Turn on water.
- To begin spraying, point nozzle in the direction you want to spray. Bend small plastic tab on side of sprayer back and turn knob clockwise to ON position.
- Spray evenly over measured area.
- To stop spraying, bend small plastic tab back and turn knob counter clockwise to OFF position. Turn off water.
- Relieve water pressure by bending plastic tab back and turning knob to ON position until water slows to a drip. Then, turn knob back to OFF position.
- Disconnect sprayer from hose.
- Apply only to actively growing turf. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn.
- Con esta botella se aplican 0.61 kg de producto por cada 93 m².
- Agite bien el producto antes de usarlo. Conecte el rociador a la manguera. Abra la llave del agua.
- Para empezar a rociar, dirija la boquilla en la dirección en la que quiera rociar. Doble la pequeña lengüeta de plástico ubicada al costado del rociador hacia atrás y gire la perilla en dirección de las manecillas del reloj hasta la posición de "ON" (abierto).
- Rocíe de manera uniforme sobre el área ya medida.
- Para dejar de rociar, doble la pequeña lengüeta de plástico hacia atrás y gire la perilla en dirección contraria a las manecillas del reloj hasta la posición de "OFF" (cerrado). Cierre la llave del agua.
- Libere la presión del agua doblando la pequeña lengüeta de plástico hacia atrás y girando la perilla a la posición de "ON" (abierto), hasta que el chorro del agua se reduzca a un goteo. Luego gire la perilla de regreso a la posición de "OFF" (cerrado).
- Desconecte el rociador de la manguera.
- Aplique al césped que esté creciendo de manera activa, únicamente. No aplique cerca del agua, drenajes pluviales o zanjas de desagüe. No aplique si se pronostican lluvias intensas. Aplique este producto a su césped, únicamente.

TIPS FOR LAWN CARE SUCCESS

Feed Regularly

†Regular feedings provide the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought & family activity.

Benefits of Multiple Feedings

1 ANNUAL FEEDING 2-3 ANNUAL FEEDINGS 4 ANNUAL FEEDINGS

Mow and Leave the Grass Clippings On Your Lawn

Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively. Grass clippings recycle the plant nutrients back into the soil.

Conserve Water

Well-fed lawns are more efficient at using available water. Feeding with Scotts® Lawn Food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses. Remember, your lawn will begin to wilt when water is needed. As much as possible take advantage of nature's sprinkler and rely on the rain to water your lawn.

SCOTTS® RECOMMENDED FEEDING ROUTINE

Plan your feeding routine with Scotts® Liquid Turf Builder® Lawn Food

EARLY SPRING

An early spring feeding helps grass green-up after the winter. You should feed around the first time you mow your grass.

LATE SPRING

Feeding now prepares grass for summer stress by thickening the blades on top and building deep roots below.

EARLY FALL

An early fall feeding replenishes the nutrients lost in the harsh summer months for quicker recovery. You should feed when your grass comes out of dormancy.

LATE FALL

Late fall is the best feeding time because it builds strong deep roots and prepares grass for winter. You should feed when all the leaves have fallen.

Florida Applications: 4 annual feedings with the exception of bahiagrass and centipedegrass (2 feedings in the north and 3 feedings in the central and south).
