Scotts®

PLANTING NEW GRASS? START IT OFF RIGHT!

Just like people need the right food to grow and develop, your new grass also has special nutritional needs. **Scotts® Turf Builder® Starter® Food for New Grass + Weed Preventer** is specially designed to be used when planting new grass. It contains a combination of nutrients to help your new lawn grow strong roots and to grow in thicker and faster than if not fed at all. Plus, it prevents bothersome weeds like dandelions and crabgrass for up to 6 weeks without harming your new grass! Scotts® Turf Builder® Starter® Food for New Grass + Weed Preventer can be used anytime you're planting new grass, whether it's starting a new lawn, reseeding an existing one, or installing sod.

For the ultimate Scotts® Lawn, use with Scotts® Turf Builder® LawnSoil™ and Scotts® Turf Builder® Grass Seed!

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Se considera una violación a la ley federal usar este producto con otros fines que los indicados en la etiqueta.

APPLY
Aplique

Apply to dry lawn, then lightly water to activate.
Follow when and where to use directions below.

Aplique al césped seco; luego, riegue ligeramente para activar el producto.
Siga las instrucciones sobre dónde y cuándo usar que aparecen a continuación.

CLEAN-UP
Limpie

To keep lawn products from reaching storm drains, sweep or blow any stray particles off hard surfaces and back onto lawn.

Para evitar que los productos para el césped ingresen en los desagües para tormentas, barra o sopla las partículas derramadas en las superficies duras de nuevo hacia el césped.

WHEN TO APPLY

- Apply on a calm day.
- Apply this product before watering newly planted grass for the first time.
- Apply when temperatures are consistently between 60°F and 90°F.

WHERE TO APPLY

- Apply to newly seeded, overseeded, or newly planted Kentucky bluegrass, tall fescue, perennial ryegrass, centipedegrass, as well as fine, spreading and creeping red fescues.

HOW TO APPLY

- Follow spreader instructions.
- Avoid application to adjacent flower beds when using a broadcast/rotary spreader.

WHAT TO EXPECT

- New weeds will sprout white or turn white and quickly die.
- This product will not kill existing weeds.
- This product may cause temporary whitening of grass foliage. Symptoms typically appear 5 to 7 days after application and may last up to 14 days.
- Discoloration is most common on ryegrass.

OTHER THINGS YOU SHOULD KNOW:

- For home lawns only.
- This product applies 0.15 pounds of Mesotrione per acre per application.
- The maximum application rate of Mesotrione per treatment site per year is 0.45 lbs.
- This package applies 4.3 pounds of product per 1,000 sq. ft.

USE PRECAUTIONS

- Do not apply this product in a way that will contact any person, or pet either directly or through drift. Keep people and pets out of the area during application.
- Do not enter or allow people or pets to enter the treated areas (except those involved in the watering) until the watering-in is complete and the surface is dry.
- Do not use this product on flowers, shrubs, trees, fruit or vegetable plants. Cacti, day lilies and roses are especially susceptible to injury.
- Do not apply another pesticide within seven days of an application of this product as turf injury may occur.
- Do not apply to St. Augustinegrass, bentgrass, bermudagrass, zoysiagrass, dicentra, kikuyograss, bahiagrass, or lippis.

CUÁNDO APLICAR

- Aplíquelo en días que no haya brisa.
- Aplique este producto antes de regar por primera vez el césped recién plantado.
- Aplíquelo cuando las temperaturas estén, constantemente, entre las 15.5 °C y las 32 °C.

DÓNDE APLICAR

- Aplique a céspedes recién sembrados, resembrados o recién plantados, de tipo hierba azul de Kentucky, festuca alta, raygras perenne, césped ciliar, así como festuca rastrera y festuca rubra.

CÓMO APLICAR

- Siga las instrucciones del esparcidor.
- Evite aplicar a las macetas de flores adyacentes cuando use un esparcidor por voleo/rotatorio.

RESULTADOS ESPERADOS

- Las nuevas malezas brotarán blancas o se volverán blancas y morirán rápidamente.
- Este producto no eliminará las malezas existentes.
- Este producto podría producir el blanqueamiento temporal del follaje del césped. Los síntomas, normalmente, aparecen entre 5 y 7 días después de la aplicación y podrían durar hasta 14 días.
- La decoloración es más común en el raygras.

OTRAS COSAS QUE DEBE SABER

- Solo para céspedes domésticos.
- Con este producto se aplican 68 g de mesotrione por acre, por aplicación.
- La proporción de aplicación máxima de mesotrione por área de tratamiento, por año, es de 0.2 kg.
- Con este paquete, se aplican 2 kg de producto por cada 93 metros cuadrados.
- No aplique este producto de forma que entre en contacto con otras personas o mascotas, ya sea directamente o al ser arrastrado por el viento. Durante la aplicación mantenga alejadas del área a las personas y las mascotas.
- No deje que las personas (excepto las personas que realizan el riego) o las mascotas ingresen a las áreas de tratamiento hasta que se termine de regar y la superficie esté seca.
- No utilice este producto en flores, arbustos, árboles, plantas frutales ni verduras. Los lirios, lirios de la mañana y caninos son particularmente sensibles a sufrir daños.
- No aplique otro pesticida dentro de los siete días a partir de la aplicación de este producto, ya que podría dañar el césped.
- No aplique en céspedes San Agustín, agrotis, bermuda, zoysia, orja de ratón, kikuyo, bahia ni lippis.

Shepherd's-purse
Velvetleaf
White clover

Yellow woodsorrel
Flatsedge
Yellow nutsedge

HOW TO CARE FOR YOUR NEW GRASS

Watering

After you've planted your new grass, continue to water at least twice a day (or more frequently if the weather is hot), until it has been mowed 1-2 times. Once your new grass is established, you can go back to a normal watering routine.

Feeding

Feeding is important for all lawns, but it's especially important for new grass plants. To keep your new grass growing and maintain a thick, green appearance, provide a follow-up feeding in 2-4 weeks with Scotts® Turf Builder® Starter® Food for New Grass. If you live in an area where Phosphorus applications are limited, feed with Scotts® Turf Builder® Lawn Food instead. Once your new grass is established, continue with regular feedings every 6-8 weeks.

Mowing

If you've seeded bare spots or a whole lawn, wait to mow the area until the new grass is at least 3 inches tall. If you've seeded over your existing lawn, you can mow as needed, but try to cut back the frequency to limit traffic on the new seedlings.

Treating Weeds

Wait until you've mowed your new grass at least 4 times before treating the new grass with a crabgrass preventer or other weed control product. Always read the product label for specific information related to the weed control product you are using. This product prevents weeds for 6 weeks.

Treating Bugs

Most bug control products can be used any time on newly planted grass. Always read the product label for specific information related to the pest control product you are using.

Water Smart®

Well fed lawns are more efficient at using available water. Feeding with Scotts® Lawn Food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Call 1-800-543-TURF (8873).

ENVIRONMENTAL HAZARDS: To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent runoff to water bodies or drainage systems.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in a cool, dry place. Reseal bag by folding top down and securing.
CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. If Empty: Place in trash or offer for recycling if available. If Partially Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
