## 18-0-6 PLUS MICRO'S

### FOR LAWNS AND LANDSCAPING

#### FERTILIZER & MICRONUTRIENTS

##### Benefits:

- Kid & Pet Friendly
- Used by Prestigious Golf Courses, Sports Stadiums, and Private Estates Around the World
- Environmentally Friendly: Contains No Phosphates, No Nitrates, No Chlorides
- Provides a Perfect Balance of Quick Release and Slow Release Nitrogen For a Fast Green-Up and for Long-Lasting Continual Feeding
- Contains a Complete Micronutrient Package
- Does Not Wash Away With Rain or Irrigation

##### Where to Use:

18-0-6 can be used on all types of grass and landscaping plants including: evergreens, trees, shrubs, ornamentals, perennials, and daylilies.

##### When to use:

Start applying 18-0-6 in the spring when temperatures rise above 50°F degrees or after the first mowing. Continue applications until fall and temperatures drop below 50°F or before the first frost. In warm climates 18-0-6 can be used all year long.

##### How To Use & Apply:

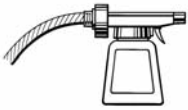

How To Use & Apply		
Lawns and Pastures	When using sprayers, mix 4 capfuls (8 fluid ounces) of product per gallon of water.	Apply every 2 weeks throughout the growing season. One quart of 18-0-6 covers 4,000 square feet
	Fill hose-end sprayer with product. Set dial to 8 fl oz. Attach to garden hose and spray evenly over entire lawn area.	
Trees & Shrubs	Mix 1 capful (2 oz) per one gallon of water. Thoroughly wet the leaves and soil around the trees and shrubs. Can be applied with watering can or sprayer.	Water plants every 2-4 weeks during the growing season.

##### How To Use:

Product may be applied by using a watering can, hose-end sprayer, backpack sprayer or trailer sprayer. Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces

##### Available Sizes:

- 1 Quart bottle
- 2.5 Gallon bottle
- 30 Gallon drum

STEP 1	STEP 2	STEP 3: CHOOSE YOUR METHOD TO APPLY				
		Watering Can	Hose-End Sprayer		Lawn and Garden Sprayer	
						
Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces	Use measuring cap to fill watering can, or sprayer with desired amount of product.	Most watering cans contain ½ to 2 ½ gallons. Use the attached measuring cap to fill watering can with correct amount of product.	Fill hose-end sprayer with product. Attach to garden hose and spray evenly over entire area.	If your hose-end sprayer has a dial, set the dial to the rate specified on the product label.	Step 1: Fill tank halfway with water. Step 2: Multiply the rate per gallon listed on the label with the total number of gallons in your spray tank. For example, if the label specifies 1 capful (2 oz) in one gallon of water, and you have a 5-gallon sprayer, you would add 5 capfuls (10 fl oz) to the tank. Step 3: Fill the rest of your tank with water.	

### Coverage Area:

- 1 Quart bottle cover 4,000 square feet
- 2.5 Gallon bottle covers 40,000 square feet ( approximately 1 acres)
- 30 Gallon drum covers 11 acres

### Shelf Life:

Has a minimum shelf life of 2 years, but when stored properly will often last longer.

### Cautions:

KEEP OUT OF REACH OF CHILDREN

### Disposal Methods:

Empty bottle can be offered for recycling or disposal in regular trash. If partly filled, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

This is not a product label. Always read and follow the product label before use.
