## PALM PRO 12-4-12

### FOR TROPICAL LANDSCAPING & LAWN CARE

#### FERTILIZER AND MICRONUTRIENTS

##### Benefits:

- Promotes Lush, Dark Green Fronds on Outdoor Palms
- Promotes Healthy Foliage and Abundant Harvests on Citrus Trees, Fruit- and Nut-Bearing Trees, and Fruiting Vines
- Excellent for Lawns and General Landscaping
- Contains Magnesium, Iron, Manganese, Copper, Zinc and Boron to Prevent Yellowing of Palms and to Promote Plant Health
- Contains Natural Organic Ingredients Including Humic Acid, Sugars, and Yucca.
- Long-Used by Professional Tropical Nurseries & Greenhouses; Now Available for Homeowners

##### Where To Use:

Apply to palms, ixoras and other ornamental plants. Use on all types of landscape plants and lawns. Great for use on all types of fruit and nut-bearing trees and vines, including: citrus, avocado, mango, apple, peach, pecan, grape, blackberry, raspberry and other fruit trees & vines.

##### When To use:

For best results, apply monthly throughout the growing season.

##### How To Use & Apply:

How To Use & Apply		
Palms, Tropical Foliage, Citrus, Mango, and Avocado	Mix 1 capful (2 fl oz) of product per gallon of water.	Apply monthly with diluted product.
	Fill hose-end sprayer with product. Set dial to 2 fl oz. Attach to garden hose and spray evenly over entire lawn area.	
All Types Of Landscape Plants	Mix 1 capful (2 fl oz) per gallon of water.	Water plants monthly with diluted product.
	Fill hose-end sprayer with product. Set dial to 2 fluid ounces. Attach to garden hose and spray evenly over entire area	
Lawns	When using sprayers, mix 4 capfuls (8 fluid ounces) of product per gallon of water.	Water monthly throughout the growing season. One quart of Palm Pro covers 4,000 square feet.
	Fill hose-end sprayer with product. Set dial to 8 fl oz. Attach to garden hose and spray evenly over entire lawn area.	

##### How To Use:

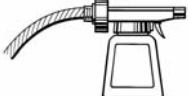

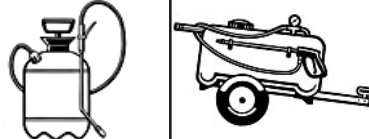

Product may be applied by using a watering can, hose-end sprayer, backpack sprayer or trailer sprayer. Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces.

## Available Sizes:

- 1 Quart bottle
- 2.5 Gallon bottle
- 30 Gallon drum

## Coverage Area:

- 1 Quart bottle covers 4,000 square feet
- 2.5 Gallon bottle covers 40,000 square feet (approximately 1 acre)
- 30 Gallon drum covers 11 acres

STEP 1	STEP 2	STEP 3: CHOOSE YOUR METHOD TO APPLY			
		Watering Can	Hose-End Sprayer		Lawn and Garden Sprayer
					
Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces	Use measuring cap to fill watering can, or sprayer with desired amount of product.	Most watering cans contain ½ to 2 ½ gallons. Use the attached measuring cap to fill watering can with correct amount of product.	Fill hose-end sprayer with product. Attach to garden hose and spray evenly over entire area.	If your hose-end sprayer has a dial, set the dial to the rate specified on the product label.	Step 1: Fill tank halfway with water. Step 2: Multiply the rate per gallon listed on the label with the total number of gallons in your spray tank. For example, if the label specifies 1 capful (2 oz) in one gallon of water, and you have a 5-gallon sprayer, you would add 5 capfuls (10 fl oz) to the tank. Step 3: Fill the rest of your tank with water.

## Shelf Life:

Has a minimum shelf life of 2 years, but when stored properly will often last longer.

## Cautions:

KEEP OUT OF REACH OF CHILDREN

## Disposal Methods:

Empty bottle can be offered for recycling or disposal in regular trash. If partly filled, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

This is not a product label. Always read and follow the product label before use.
