TRIPLE TEN 10-10-10

GARDEN & VEGETABLE FERTILIZER

PLANT FOOD

Benefits:

- Grow Bigger, More Beautiful Vegetables and Flowers
- All-Purpose Plant Food Concentrate is Excellent for Trees, Shrubs, and Ornamentals
- The Quick and Easy Way to Water and Feed
- Slow-Release Nitrogen for Even, Continuous Feeding, Plus Six Key Micronutrients
- Used by Professionals and Commercial Growers; Now Available for Homeowners
- Made With The Purest Ingredients, Contains No Harmful Nitrates, Phosphates or Chlorides

Where To Use:

An all-purpose plant food for vegetables, herbs, berries, and flowers including annuals and perennials. Use to get bigger, healthier tomato plants with more abundant harvests, or wherever your plants need a boost.

When To use:

Start using Triple Ten 10-10-10 on new vegetable or herb seedlings 2 weeks after they germinate. Water newly planted vegetable and herbs with 10-10-10 at time of plantings. Apply every two weeks throughout the growing season until vegetables and herbs are harvested.

How To Use & Apply:

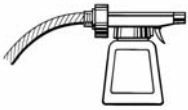

How To Use & Apply		
All types of Vegetables, Herbs and Flowering Plants	Mix 1 capful (2 fl oz) per gallon of water. Water plants thoroughly. Apply by using a watering can, or garden sprayer.	Apply every two weeks with diluted product.
	Fill hose-end sprayer with product. Set dial to 2 fluid ounces. Attach to garden hose and spray evenly over entire area	
Trees, Shrubs, And All Types Of Landscape Plants	Mix 1 capful (2 fl oz) per gallon of water.	Water plants monthly with diluted product.
	Fill hose-end sprayer with product. Set dial to 2 fluid ounces. Attach to garden hose and spray evenly over entire area	

How To Use:

Product may be applied by using a watering can, hose-end sprayer, backpack sprayer or trailer sprayer. Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces

Shelf Life:

Has a minimum shelf life of 2 years, but when stored properly will often last longer.

STEP 1	STEP 2	STEP 3: CHOOSE YOUR METHOD TO APPLY				
		Watering Can	Hose-End Sprayer		Lawn and Garden Sprayer	
						
Easy to measure cap included on bottle. 1 Cap = 2 fluid ounces	Use measuring cap to fill watering can, or sprayer with desired amount of product.	Most watering cans contain ½ to 2 ½ gallons. Use the attached measuring cap to fill watering can with correct amount of product.	Fill hose-end sprayer with product. Attach to garden hose and spray evenly over entire area.	If your hose-end sprayer has a dial, set the dial to the rate specified on the product label.	Step 1: Fill tank halfway with water. Step 2: Multiply the rate per gallon listed on the label with the total number of gallons in your spray tank. For example, if the label specifies 1 capful (2 oz) in one gallon of water, and you have a 5-gallon sprayer, you would add 5 capfuls (10 fl oz) to the tank. Step 3: Fill the rest of your tank with water.	

Available Sizes:

- 1 Quart bottle
- 2.5 Gallon bottle
- 30 Gallon drum

Coverage Area:

- 1 Quart bottle cover 16,000 square feet
- 2.5 Gallon bottle covers 160,000 square feet (3.67 acres)

Cautions:

KEEP OUT OF REACH OF CHILDREN

Disposal Methods:

Empty bottle can be offered for recycling or disposal in regular trash. If partly filled, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

This is not a product label. Always read and follow the product label before use.
