

# BUSHDOCTOR

## SledgeHammer

Bush Doctor SledgeHammer® is a unique rinse formula designed to remove fertilizer buildup and encourage water movement through your garden's soil. Sledgehammer® helps release surface tension in the soil which will allow for optimum absorption of moisture and nutrition throughout the plant's root system. Derived from an extract of the Yucca plant called Saponin, Sledgehammer® is organic and can be used for both hydroponic and soil applications.

Sledgehammer® is perfect to use for all plants. Use on established gardens to break up harmful salt buildup. Sledgehammer® is very beneficial to lawns as a monthly drench to release salts and allow optimal water and nutrient absorption. Sledgehammer® will also break up salt buildup in houseplants, vegetable gardens, and all hydroponic systems.

**Directions:** For in-ground and container gardens, mix 2 teaspoons per gallon of water once every 3-4 weeks. For lawns, use 2-3 teaspoons per gallon once per month. Can be used in a hose-end sprayer; follow sprayer manufacturers instructions at a dose of 2 teaspoons per gallon.

**Derived From:** Saponin from Yucca schidigera

Available in Quart and Gallon Sizes

### Growing System

### In-ground gardens and container plantings:

### Hydroponic recirculating systems:

#### How Much:

Mix 2 teaspoons (10mL) per gallon of fresh water.

Mix 1/2 teaspoon (2.5mL) per gallon of fresh reservoir water.

#### How to Use:

Drench soil or preferred medium thoroughly. Apply every other week throughout the vegetative and blooming cycles, particularly during the earlier stages of plant development.

Use in conjunction with FoxFarm fertilizers or any nutrient regimen. Flush system every two weeks.

#### Flush:

Mix 1/2 teaspoon (2.5mL) per gallon of fresh reservoir water.

Perform a complete system flush every two weeks. Cycle your system for one hour and change reservoir water.
