

**Stop Animal Chewing Damage with**

# “Sting-Em!”

**Multi-Purpose Irritating Grease**

SP\_714c

Sting Em is a surface protectant, dielectric grease and contact irritant useful for protecting structural surfaces, electrical wiring and junction boxes from damage related to corrosive weather elements and undesirable animal activity such as chewing.

Use as directed. Read the entire label before use. Sting Em is a dielectric grease and contact irritant. It can be applied to indoor and outdoor surfaces, such as wood, metal, plastic, ceramic tile, brick, cinder block and cement. Porous surfaces must be sealed smooth before application. Scoville rating of 10,500

Useful for:

- Residential, industrial & manufacturing sites
- Storage, garage & warehouse sites
- Autos, boats & marine equipment, farm equipment, construction equipment, etc.
- Electric, phone and cable connections

## Warnings:

Keep out of reach of children. May cause eye irritation. Wear safety glasses and gloves when handling. Avoid eye, skin and clothing contact. Wash thoroughly with soap and water after handling.

**Porous surfaces must be sealed smooth before applying Sting-Em.**

This can easily be done by spreading a coat of silicone on the porous surface prior to applying Sting Em.

## General Application Instructions

Apply to surface or wires directly from the tube, then spread on with a small paintbrush or blade to limit natural occurring oil separation. Do not rub or buff the grease. Leave a visible coat. use between 0.25 and 1.0 oz per linear foot, or 2.0 to 4.0 oz per square foot, depending on the type of protection and/or irritation level desired.
