*Note: *Application rates vary depending on the specific use and the target pest. Always refer to the product label for the recommended rates.

### Suspend SC Insecticide

- **Control of Turf Insects:**
  - **Grasshoppers:** Need 4 to 10 gallons of water per 1000 sq. ft. for adequate coverage of dense turfgrass canopies.
  - **Mole crickets:** Require 0.25 to 0.5 inch of water immediately after application.
  - **Japanese beetles:** Need 0.25 to 0.5 inch of water immediately after application.

- **Control of Structural Pests:**
  - **Carpenter bees:** Apply a 0.06% suspension or sufficient volume of foam using an appropriate treatment tool with a splashback guard.
  - **Tunneling carpenter ants:** Apply a 0.06% suspension as a drench or inject the suspension into structural members, drill to find the interior infested cavity, and inject the suspension or foam.

- **Control of Insect Pests:**
  - **Japanese beetles:** Use the recommended rate suspension converted to a foam to achieve the desired effect.
  - **Japanese beetles:** Apply to control carpenter ants in soil.

### IMPORTANT BLUE BUYER USE

- **Note:** Use of this product may result in damage to ornamentals. Apply sun-leafhoppers, mealybugs, scarab beetles, Japanese beetles, bagworms, boxelder bugs, cankerworms, cardamom thrips, cockroaches, flies, fungus gnats, grasshoppers, greenstriped webworms, imported willow leaf beetles, Japanese beetles, redburged caterpillars, red imported fire ants, saw fly larvae, sow bugs, spikey fleas (adult), ticks, webworms, yellow necked caterpillars, and other pests.

### Storage & Disposal

- **Waste Disposal:** Wastes resulting from the use of this product may be disposed of on site or treated under appropriate conditions.
- **Precautions:** Do not contaminate water, food, or feed by storage or disposal. Wash hands after handling.
- **Disposal:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

### **WARNING**

- **Do not apply** to institutions (including libraries, sport facilities, etc.) in the immediate area when occupants are present.
- **Do not apply** this product to edible crops.
- **Do not apply** to areas used by the elderly or infirm.

### **NOTES:**

- **Rearrange Control:** Bayer CropScience LP will not be liable for any incidental or consequential damages, losses, or injuries arising out of the use of this product. Bayer CropScience LP will not be liable for any negligence, strict liability, or otherwise, shall not exceed the purchase price paid, or at Bayer CropScience LP's election, the replacement of product.

### **STORAGE:**

- **Conditions:** Store in a dry well-ventilated place. Keep out of the reach of children. Safely dispose of container and any unused material according to local, State, and Federal regulations.

### **INFORMATION:**

- **Product of India**

---

**INSECTICIDE**

- **Suspend SC Insecticide**
  - **For Use Under and Around:** Residential lawns and horticultural sites, including residential and nonresidential areas, lawns & recreational areas, athletic fields, ornamentals, and turfgrass.
  - **For Use With:** Suspend SC Insecticide.

---

**APPLICATION INFORMATION:**

- **Rate:** 0.06% suspension.
- **Volume:** Use the recommended rate suspension converted to a foam to achieve the desired effect.
- **Method:** Apply by broadcast or ground application using a hand or mechanical applicator.
- **Surface:** Use mechanical applicators approved for use with Suspend SC Insecticide.

Suspend SC is a suspeded concentrate insecticide containing 0.42 lb active ingredient per gallon. Suspend SC Insecticide is designed for use both indoors and outdoors and will provide effective control of a variety of pests. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**GENERAL INFORMATION:**
- This product is extremely toxic to fresh water and estuarine fish and invertebrates. Use with care when in or near water bodies.
- Do not make applications during rain.
- For product information, call toll-free: 1-800-331-2867.

**FOR PRODUCT INFORMATION, CALL TOLL-FREE:**

**PRODUCT INFORMATION:**

**GENERAL PEST CONTROL INDOORS**

- **Crawling and Flying Insect Pests (such as flies, gnats, midges, mosquitoes, cockroaches):** Apply as a coarse, low pressure spot or crack and crevice spray to areas that these pests normally inhabit. For control of above-ground termites inside trees, utility poles, fencing and decking materials and for residual control of termites in building voids, termite carton nests in building voids may be injected with 0.06% suspension or foam using a point injection tool. Apply 0.06% suspension or foam using an appropriate treatment tool with a splashback guard.

**GENERAL PEST CONTROL OUTDOORS**

- **Perimeter Treatments:** For residual control of crawling and flying insects in and around these structures, apply 0.06% suspension or foam to buildings, porches, screens, window frames, eaves, patios, refuse dumps, lawns, trees, and other areas where pests may rest. The vacuum cleaner can also be applied out-of-doors for flea control. Do NOT treat pets with this product.

**INFORMATION FOR USE:**

- **Pests**
  - Asian lady beetle, pillbugs, sow bugs, scorpions, house, cluster and horseflies, hornets, yellow jackets, wasps, yellowjackets, stinging insects, bees, bumble bees, mosquitoes, midges, gnats, black flies, deer flies, horseflies.
  - Ants (odorous house, pavement, fire, pharaoh), roaches, silverfish.
  - June bugs, grubs, springtails, sow bugs, scorpions, earwigs, millipedes.

**APPLICATION INSTRUCTIONS:**

- Respiratory protection and eye protection should be worn when applying Suspend SC Insecticide. Use of respirator is required for rates above 0.03% and when it is not feasible to use a spray rig designed to prevent thoracic deposition. Do not blow or wash pesticide off the treated area. Rinsing application equipment over the treated area is recommended. Do not apply near birds or fish foraging or swimming areas.

**APPLICATION RESTRICTIONS:**

- Use only when and where pests are active and may find entrance. It is recommended to treat a band of soil or lawn up to 6 -10 feet wide around structures to kill adult and accessible stages of insect pests such as ants, termites and earwigs. Do not blow or wash pesticide off the treated area. Rinsing application equipment over the treated area is recommended. Do not apply to anim al feed or watering equipment.

**TREATMENT SITES:** When used in accordance with label directions, Suspend SC Insecticide may be applied to walls, floors, ceilings, in and around cabinets, between, behind and beneath equipment and appliances, around floor drains, window and door frames and areas where pests may rest.

**WASHING INSIDE OR OUTSIDE...**

- Do not wash the treated area. Clean any equipment used in application with non-corrosive detergent and water.

**PANTRY PEST CONTROL:**

- **Food Manufacturing Plants:** Process areas and equipment with the recommended rate of 0.01% to control insect pests. Premise Pest Control: Apply as a spot treatment. This product can be applied to walls, floors, ceilings, in and around cabinets, between, behind and beneath equipment and appliances, around floor drains, window and door frames and areas where pests may rest. For control of store-bred pests, the vacuum cleaner can also be applied out-of-doors. Do NOT treat pets with this product.

**FLEAS AND TICKS:**

- For the control of fleas, lice, ticks and other biting insects in and around homes and premises, light applications (0.01% - 0.03%) of Suspend SC Insecticide may be made to surfaces of buildings, porches, screens, window frames, eaves, patios, refuse dumps, lawns, trees, and other areas where pests may rest. For residual control of flea infestations, this product can be applied to walls, floors, ceilings, in and around cabinets, between, behind and beneath equipment and appliances, around floor drains, window and door frames and areas where pests may rest. The vacuum cleaner can also be applied out-of-doors for flea control. Do NOT treat pets with this product.

**TANK MIXING:**

- Suspend SC Insecticide may be tank-mixed with other currently registered pesticides approved by EPA for such use and treating outside areas frequented by pets. Suspend SC Insecticide may be applied as a coarse spray or through a pressurized or power operated sprayer or other suitable equipment for applying insecticides. Shake container well before using. When diluting, it is recommended to add approximately 37.5 fl oz/50 gals of water to each gallon

- Tank mixing: Use Suspend SC Insecticide at the recommended rate of 0.01% - 0.03% w/w in the product. Other pesticides may be added at the recommended rate. Observe all restrictions and precautions, which appear on the label of the pesticide with which Suspend SC Insecticide is tank-mixed. Prepare spray solution when ready to make applications. Do not exceed the recommended concentration. Do not mix with other pesticides using incompatible solvents or under conditions of high temperature or pressure. Do not use in an emulsion or solution of another pesticide unless its label specifically authorizes its use in combination with Suspend SC Insecticide.

- Spot Applications:
  - Candy plants: Apply as a coarse, low pressure spot or crack and crevice spray to areas that pests normally inhabit. Perim ter Pest Control: For residual control of crawling and flying insects in and around these structures, apply 0.06% suspension or foam to buildings, porches, screens, window frames, eaves, patios, refuse dumps, lawns, trees, and other areas where pests may rest. Do not apply to anim al feed or watering equipment.

- Premise Pest Control:
  - Food Manufacturing Plants: Process areas and equipment with the recommended rate of 0.01% to control insect pests. Premise Pest Control: Apply as a spot treatment. This product can be applied to walls, floors, ceilings, in and around cabinets, between, behind and beneath equipment and appliances, around floor drains, window and door frames and areas where pests may rest. For control of store-bred pests, the vacuum cleaner can also be applied out-of-doors. Do NOT treat pets with this product.
ENVIRONMENTAL HAZARDS

Calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area applying in areas adjacent to any body of water. To protect the environment, do not allow pesticide to...
## APPLICATION RESTRICTIONS

This pesticide is highly toxic to bees exposed to direct treatment. Do not apply or allow it to drift to water bodies or drainage systems. Do not water the treated area to the point of run-off. Do not make applications during rain.

### Application Instructions

#### Indoor Residual Surface Treatment

- May be applied to hard surfaces such as wood, metal, concrete, glass, and tile. Apply in a coating application.
- Applications may be made to accessible areas of wood by applying a 0.06% solution to control exposed worker and winged reproductive forms of termites. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made around electrical conduits by drilling and then injecting the insecticide into the wood where wood is vulnerable. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood.

#### Outdoor Residual Surface Treatment

- Applications may be made to accessible areas of wood by applying a 0.06% solution to control exposed worker and winged reproductive forms of termites. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood. Applications may be made to inaccessible areas by drilling and then injecting the insecticide into the wood.

#### Treatment sites

- Treatments may be applied at 21-day intervals or as necessary to maintain adequate control. Remove treated surfaces to dry and cover shelves with clean paper prior to replacing foodstuffs, utensils or electrical equipment. Do not apply as a space spray. Restrict applications to furniture where no prolonged contact by humans will occur. Do not allow people or pets to contact treated areas until spray dries.
**Suspend SC Insecticide**

**Application Rates For Turfgrass Areas**

- **White Grubs**, **Japanese Beetle**, **European Chafer**: 0.08 to 0.13 lb a.i./Acre
- **Chinch Bugs**, **Mites** (adults): 0.05 to 0.08 lb a.i./Acre
- **Springtails**, **Spiders**, **Worms**, **Sow Bugs**: 0.04 to 0.06 lb a.i./Acre
- **Annual Bluegrass Weevils**, **Leafhoppers**, **Moths**, **Fleas** (adults): 0.04 to 0.06 lb a.i./Acre
- **Cockroaches**, **Mice**, **Centipedes**, **Chiggers**

**Application Rates For Ornamentals**

- **Carpenter Bees** in structures: 0.06% suspension
- **Carpenter Ants** in houses and other structures: 0.06% suspension
- **Carpenter Ants** in trees, utility poles, fencing, and decking materials: 0.06% suspension
- **Ants** in cracks and crevices of walls, driveways, or other hard surfaces where ants are tunneling beneath the surfaces: 0.06% suspension
- **Wasp Nest**s: 0.06% suspension

**Important Before Use**

- Do NOT use on firewood or in locations where the product may come in contact with water bodies, marshes, wetlands, ponds, or other bodies of water.
- Do NOT apply to turf within 100 feet of coastal dunes.
- Do NOT apply to plants within 5 feet of flowerbeds or gardens.
- DO NOT apply in hospital patient rooms.
- DO NOT apply in any room occupied by the elderly or infirm.

**Suppression Only**

- **Carpenter Ants** in trees, utility poles, fencing, and decking materials
- **Ants** in cracks and crevices of walls, driveways, or other hard surfaces where ants are tunneling beneath the surfaces

**Remarks**

- Thoroughly apply the finished spray to upper and lower leaf surfaces to ensure adequate coverage, but prior to dripping. Be sure to penetrate dense foliage to wet leaves, especially on lower leaf surfaces.

**Precautions and Warnings**

- Do NOT apply this product in hospital patient rooms while occupied or in any room occupied by the elderly or infirm.

**PESTICIDE DISPOSAL**

- Drain for 10 seconds after the flow begins to drip. Repeat this procedure twice.
- Treat burned material in a similar manner for control of burn damage to ornamentals.
- Avoid inhaling the dust directly at a treated area for control of burn damage in areas up to 50 feet.

**STORAGE & DISPOSAL**

- Discard properly sealed containers in accordance with local regulations.
- Discard any remaining product, including containers, in accordance with local regulations.

**Research Triangle Park, NC 27709**

**Produced for:** Bayer Environmental Science

**Content & Conditions**

- This product is only for use in the home and on personal property as outlined on the label.
- Before using this product, read the label and follow all instructions carefully.
- Keep out of reach of children and pets.

**Disclaimer of Warranties**

- The manufacturer disclaims all warranties, express or implied, of fitness for a particular purpose or otherwise, that extend beyond those contained herein or to modify the warranties contained herein. To the extent consistent with applicable law, the exclusive remedy for Breach of Warranty, including breach of any express or implied warranty, shall be the repair or replacement of the product, at the sole option of the manufacturer. The manufacturer shall not be liable to any person for any other, loss or damage, whether the same be for negligence, strict liability or otherwise, which extends beyond the purchase price paid, or at the manufacturer's election, the replacement of product.
**Target Insects**

When applying Suspend SC Insecticide, target insects must be exposed to the insecticide to be controlled. For optimal control of surface-feeding insects, delay irrigation or mowing for 24 hours after application. For subsurface-feeding insects, allow the treated area to dry before allowing pets or people to enter the treatment area. Target insects must be exposed to the insecticide to be controlled. For optimal control of surface-feeding insects, delay irrigation or mowing for 24 hours after application. For subsurface-feeding insects, allow the treated area to dry before allowing pets or people to enter the treatment area.

**Application Rates**

For turfgrass sites, use the recommended rate suspension converted to a foam to achieve the necessary volume of foaming agent. Use the recommended rate suspension converted to a foam to achieve the necessary volume of foaming agent. For turfgrass sites, use the recommended rate suspension converted to a foam to achieve the necessary volume of foaming agent.

**Tank Mixing**

Suspend SC Insecticide has been found to be compatible with many commonly used surfactants and other ingredients. Read and follow the label instructions for mixing with other products. When mixing with other products, it is recommended to mix the active ingredient first with water, then add the surfactant and other ingredients, and finally add the foaming agent. Mix all components thoroughly before use.

**Landscape/Ornamental Uses**

Suspend SC Insecticide can be converted to a foam and the foam used to treat structural voids to control insect and arthropod pests in walls, under slabs or in other void areas. Mix the end-use dilution of Suspend SC Insecticide with manufacturer’s recommended volume of foaming agent. Use the recommended rate suspension converted to a foam to achieve the necessary volume of foaming agent.

**Special Instructions**

- Do not allow pets or people to enter the treatment area for 24 hours after application.
- Do not allow pets or people to enter the treatment area for 24 hours after application.
- Do not allow pets or people to enter the treatment area for 24 hours after application.

**Storage and Disposal**

- Store in a cool, dry place.
- Keep out of reach of children.
- Do not use near water bodies.
- Do not contaminate water bodies.
- Do not contaminate water bodies.

**Waste Management**

Wastes resulting from the use of this product may be disposed of on site or at a commercial waste disposal facility. When applying this product, wear protective clothing and follow all safety precautions. When using or handling this product, keep out of reach of children. Do not allow pets or people to enter the treatment area for 24 hours after application.

**Important Buton Use**

- Do not apply to or near water bodies.
- Do not contaminate water bodies.
- Do not contaminate water bodies.

**IMPORTANT: READ BEFORE USE**

The directions for use of this product are believed to be adequate and must be followed. The directions for use of this product are believed to be adequate and must be followed. The directions for use of this product are believed to be adequate and must be followed.

**Insecticide**

*Suspend SC Insecticide* can be converted to a foam and the foam used to treat structural voids to control insect and arthropod pests in walls, under slabs or in voids in masonry. Foam is an alternative to dusts and fogging for application of Suspend SC Insecticide. It will expand quickly due to the carbon dioxide gas released after the foam is applied. Foam application is an efficient method for treating masonry voids where dust applications are not feasible. Foam is an excellent alternative for treating tight spaces including small drilled holes into voids where these ants or their nests are present. Use foam in or around buildings, under slabs, and in trees to control the following pest species:

- **Ants**: Argentine, Argentine fire, Argentine Pavement, Argentine silver, Bigheaded, Bigheaded fire, Bigheaded pavement, Bigheaded silver, California fire, Carpenter, Fire, Fire pavement, Fire silver, Little Argentine, Little Argentine fire, Little Argentine silver, Pavement, Pavement silver, Pharaoh, Reticulated, Thief, and Tricolor.
- **Carpenter Bees**: Asian, European, Western.
- **Carpenter Ants**: Argentine, Bigheaded, Fire, Pavement, Silver, Tricolor, and Tropical.
- **Wasp**: Paper.

**Foam Application Use Directions:**

1. Fill a 1-gallon foam applicator tank with water and foam (application equipment or 5-gallon bucket). Add the correct proportion of Suspend SC Insecticide and water in a quart jar to make 1 gallon of foam. Mix well to ensure proper physical compatibility of the mixture. Fill foam applicator tank with the foam to be applied and ensure adequate coverage. Apply over a 10-second period to ensure proper mixing. Apply around doors and windows to prevent ants or termites from entering the premises. Apply around foundation walls and crevices through small drilled holes to voids where these ants or their nests are present. Use foam in small drilled holes to voids where these ants or their nests are present. Use foam in small drilled holes to voids where these ants or their nests are present.

2. Apply Suspend SC Insecticide to exposed termite wood with a 0.06% suspension, or stack Insecticide with a 0.06% suspension at 1 gallon per 8 square feet to prevent termite damage. Apply Suspend SC Insecticide to exposed termite wood with a 0.06% suspension, or stack Insecticide with a 0.06% suspension at 1 gallon per 8 square feet to prevent termite damage.

**Landscape Ornamental Treatments:**

- **Application Rates For Turfgrass Sites**: Apply using a minimum of 2 gallons of water per 1000 sq. ft. Higher volumes suitable equipment for turfgrass pests according to the rates listed in the Application Rates for Uniform coverage is essential. Begin applications when pests are evident. Apply Suspend SC Insecticide to exposed termite wood with a 0.06% suspension, or stack Insecticide with a 0.06% suspension at 1 gallon per 8 square feet to prevent termite damage.

**Plant Safety Testing:**

Plant safety testing has been conducted on many species of ornamental plants under a wide range of environmental conditions. No phytotoxicity has been observed in any species of ornamental plant under a wide range of environmental conditions. Some ornamentals can be affected by the use of Suspend SC Insecticide, but the effects are not immediately visible. Post-application evaluation of plants is strongly recommended. To ensure adequate coverage, but prior to dripping. Be sure to penetrate dense foliage to wet leaves, stems, and flowers. To ensure uniform coverage, apply in the early morning or late evening, as needed. Application rates are designed to ensure correct coverage for the given rate and pest species. If the equipment has not been previously used, mix the correct proportion of products and water in a quart jar to make 1 gallon of foam. Mix well to ensure proper physical compatibility of the mixture. Fill foam applicator tank with the foam to be applied and ensure adequate coverage. Apply over a 10-second period to ensure proper mixing. Apply around doors and windows to prevent ants or termites from entering the premises. Apply around foundation walls and crevices through small drilled holes to voids where these ants or their nests are present. Use foam in small drilled holes to voids where these ants or their nests are present. Use foam in small drilled holes to voids where these ants or their nests are present.

**Storage & Disposal:**

- **STORAGE**: Mix as needed. Store in original container in a secured dry storage area. Avoid extreme temperatures. Prevent cross-contamination with other pesticides and fertilizers. If the container is leaking and/or material is spilled, on floor or paved surfaces, absorb on sawdust or other commercially available absorbing material, sweep up and remove to chemical waste area for disposal instructions. Never place unused product down any indoor or outdoor drain.
- **Disposal of Wastes**: Wastes resulting from the use of this product may be disposed of on site and/or in accordance with local, state, or federal laws and regulations.**
