

Lasting, broad-spectrum control with a single application rate!

WHAT IT IS

Tekken™ Broad Spectrum Fungicide offers golf course superintendents dependable control of 21 of the most problematic diseases in turf, including dollar spot, brown patch, and anthracnose. Tekken uses two active ingredients to provide two different modes of action, helping manage resistance and deliver broad-spectrum control for up to 28 days.

The patent-pending formulation of Tekken increases turf quality while reducing the phytotoxicity and thinning of creeping bentgrass that can come with stand-alone DMI applications. And Tekken is applied with one convenient rate for all turfgrass uses, eliminating the guesswork.

WHAT IT DOES

Tekken controls:

- Anthracnose
- Brown patch
- Dollar spot
- Fairy ring
- Gray leaf spot
- Powdery mildew
- Red thread
- 14 more as listed

Labeled for use on:

- All golf course turfgrass species

Ideal for use on:

- Fairways
- Greens
- Tees
