

# T/I 2.5G

## Pre-Emergent Herbicide

Up to 8-months of selective pre-emergent control of more than 100 broadleaf weeds and grasses with a single application. Performance proven on field- and container-grown ornamentals.

- Saves time and money with proven pre-emergent control on a broad-spectrum of broad and grass weeds in hundreds of ornamentals.
- Excellent crop tolerance and flexible application: early spring, late summer or early fall prior to weed germination or immediately following cultivation.
- Low water solubility - remains in weed zone once activated by rainfall or irrigation.
