DIRECTIONS FOR USE

Apply only as directed. Use ContecDG® Dispersing Granule Technology 17-0-17 for greens, tees and other fine turf areas where a high nitrogen and potassium application is desired or when iron and manganese are needed to help correct or prevent deficiencies during the growing season.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will greatly reduce ball, shoe and mower pickup.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

Application Rates:

- LOW: 2.94 lbs./1,000 sq. ft.
- HIGH: 5.88 lbs./1,000 sq. ft.
