

HOW TO USE CITRUSGAIN: CITRUSGAIN is formulated specifically for citrus and other plants having similar requirements.

First Application

Planted in Ground: 2lb bag per 100 sq. feet.

In Container: 3 tablespoons per plant (per 14" container, adjust amount by 1/2 tablespoon for each pot size smaller or larger.)

Before planting, work (mix) the first application into the soil about 3-4" below the base of the plant.

Second Application

Planted in Ground OR in Container: 2 tablespoons per plant.

At first fruit set, apply the second application. Be sure to work (mix) the granules well into the soil.

Applications Thereafter

Planted in Ground OR in Container: 1 tablespoon per plant.

Apply every 10 to 14 days throughout the growing season.

Do **not** apply fertilizer at the base of the plant stems. Be sure to water the area well after fertilizing. Take care to brush or wash fertilizer granules off leaves to prevent injury (burn).
