

With Natural Salicylic Acid?

Chitosan provides an eco-friendly alternative to synthetic growth regulators improving defense and enhancing stress tolerance

Brown Algae Extract?

Organic and sustainable alternatives that are natural compounds, macro and micronutrients, growth-promoting substances. Their high concentration improves root growth and plant health.

How To Apply?

Water-reduced formulation. For best results, apply every 2 weeks. Works equally well in cold or warm weather. Use 4oz per gallon of water. Apply either directly to leaves until they are wet. Lawns and gardens and create enough water to cover the desired area every 30 days throughout the growing season. Recommended usage is 4oz per one gallon of water.
