

Triple Superphosphate 0-45-0

GUARANTEED ANALYSIS:

Available Phosphate (P₂O₅).. 45.00%

Plant Nutrients Derived From: Triple Superphosphate F1290

Produced from rock phosphate, Bonide's Triple Superphosphate is a readily available form of phosphate. The phosphorus in this compound is used by plants to produce sugar during photosynthesis and to encourage root growth and flower and fruit production. This fertilizer is created by subjecting rock phosphate to a chemical reaction that enhances the availability of phosphorous. Triple Superphosphate is a widely used source of phosphorus. Triple Superphosphate is best used on plants grown for their flowers, fruits or vegetables.

DIRECTIONS FOR USE

Apply Only as Directed. Wash off any plant food which accidentally get on foliage.

Feeding Vegetables, Fruit, Flowers and Herbs at planting: Add 8 oz. (1 cup) for every 100 square feet garden or 4 oz. (1/2 cup) for 50 square feet of row. Incorporate into the soil to a depth of 6 to 8 inches. Water thoroughly.

Feed Vegetables, Fruit, Flowers and Herbs while growing: Incorporate into the top one inch of soil 8 oz. (1 cup) per 100 square feet of row; 4 oz. (1/2 cup) per 50 square feet of row. Water thoroughly. Apply every 6-8 weeks throughout the growing season.

This chart will give you a general application rate when used with a soil test. For more accurate application rates for your area, contact you county extension service.

General Application Rates

Fertility Level	10 sq. feet	100 sq. feet	1000 sq. feet
Much Below Normal	1.5 oz. (3 Tb.)	1 lb. (2 cups)	5 lb. (16 cups)
Slightly Below Normal	1 oz. (2 Tb.)	8 oz. (1 cup)	5 lb. (9 cups)
Normal Level Maintenance	.5 oz. (1 Tb.)	5 oz. (2/3 cups)	3 lb. (5 1/3 cups)

How to read a fertilizer label.

Fertilizers are rated by three numbers, such a 0-45-0. The numbers tell what percentage of primary nutrients the fertilizer contains. The first number is the percentage of Nitrogen; the second number is the percentage Available Phosphate (P₂O₅); the third number is the percentage of soluble Potash (K₂O).

When purchasing fertilizer, keep in mind that typically the first number, or Nitrogen, emphasizes a green color and denser foliage. The middle number, Available Phosphate, emphasizes the development of flowers, fruits or vegetables. And the third number, Soluble Potash, emphasizes overall plant hardiness and its ability to withstand stress.

FOLLOW DIRECTIONS CAREFULLY.

Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the manufacturer. Buyer assumes all risks of use, storage and handling of this product.

Store in a dry place.

MANUFACTURER'S STATEMENT:

This product conforms to the Guaranteed Analysis on the label. Manufacturer's directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used a directed under normal use conditions. This product is sold as is. Manufacturer makes no warranties, express on implied. In no event shall manufacturer be liable for special, indirect, incidental or consequential damages of any kind.

CAUTION: Keep this product out of the reach of children. Keep from contact with eyes, cuts or sores. Wash hands after use. Not for human consumption.

NOTE: This product is sold by weight, not volume. Settling may occur during shipment.
