

Tupersan®

HERBICIDE WETTABLE POWDER

Pre-emergent control with high selectivity

WHAT IT IS

Tupersan® Herbicide Wettable Powder provides highly effective pre-emergent control of smooth and large crabgrass, downy brome, foxtail, and barnyardgrass in newly seeded or established listed turfgrasses. This high degree of selectivity allows seeding later in the spring when soil temperatures are warmer and more conducive to seed germination. It's labeled for use on Kentucky bluegrass, smooth brome, perennial ryegrass, and listed fescues on sod farms, as well as golf courses (aprons, fairways, greens, and tees), ornamental turfgrass and lawns, parks, sports facilities, and roadsides.

WHAT IT DOES

Tupersan controls:

- Smooth and large crabgrass
- Downy brome
- Foxtail
- Barnyardgrass

Ideal for use on:

- Sod farms
- Golf courses (aprons, fairways, greens, and tees)
- Ornamental turfgrass and lawns
- Parks
