

RODENT TERMINATOR

Piège électronique pour rongeurs • Electronic Rodent Trap • Trampa electrónico para roedor

Do you have a rodent in your attic, crawl-space or barn?
Don't worry, the Rodent Terminator RT-100 for 2013 arrives Wireless Ready!

With just 2 screws and less than 2 minutes,
anyone can add the W.A.R unit to their RT-100!

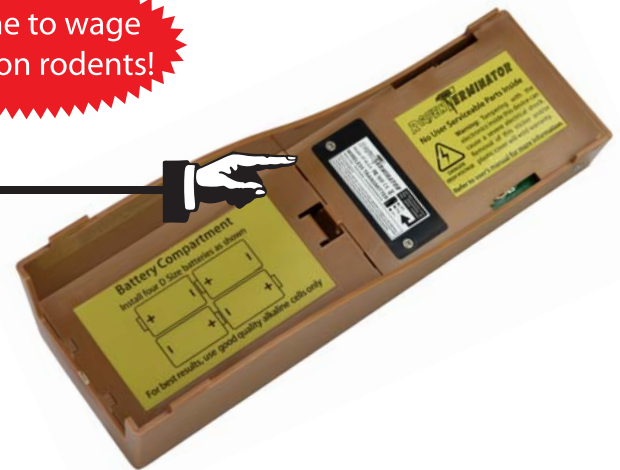

Receiver unit
Size: 1.5" wide x 3.5" high x .5" thick

The transmitter unit fits perfectly in the electronics compartment of a Wireless Ready RT-100.

It's time to wage
W.A.R. on rodents!

The receiver unit constantly monitors the status of the Rodent Terminator!

- The Wireless Accessory Receiver (W.A.R.) comes in an attractive retail package that should be merchandised next to the Rodent Terminator RT-100 for an easy upsell.
- The kit contains the transmitter unit, mounting screws, the receiver unit with stand and a UL approved AC adaptor to keep it constantly on watch.

2013 RT-100'S have this logo on the box
