

Zero Ice®

ICE & SNOW MELTER

DIRECTIONS FOR USE

STEP ONE: Sprinkle Zero Ice® evenly on ice, snow, and sleet-covered surfaces. Do not clump Zero Ice.

Apply 1 cup per square yard (3' x 3').

STEP TWO: Shovel or sweep to remove melted ice, snow, sleet, slush (water), and remaining Zero Ice **15-30 minutes after applying.**

Repeat applications:
Use as directed above each
time Zero Ice is applied.

**Always follow Directions.
Read Use & Safety Tips
Before Applying.**

*We make no warranty,
assumption of the risk applies.*

NOTICE Seller makes no warranty, expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, as to the results and/or consequences of the use of this product. Buyer assumes all risk of use, handling and storing of this product. Seller shall bear no responsibility for damages, including but not limited to consequential damages, incurred by Buyer resulting from the use of this product.

USE & SAFETY TIPS

Do not use on new, chipped, cracked, or porous surfaces.

Do not use on concrete less than 2 years old.

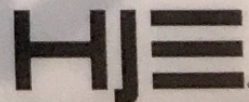

Remove melted ice, snow, sleet, slush (water), and remaining Zero Ice from surfaces **as directed** to help prevent damage.

Damage can occur from water and slush seeping into surfaces and refreezing.

Caulk, fill, or repair cracks in surfaces before winter and freeze/thaw cycles begin. This may help to prevent damage from occurring.

Do not eat Zero Ice. Keep Zero Ice out of eyes. Zero Ice contains potassium chloride—drink water if swallowed. Flush eyes or any affected area with water and call a physician.

Keep Zero Ice away from children and pets.
