DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Not for use on turfgrass being grown for sale or other commercial use, or for commercial seed production. For use on turfgrass intended for aesthetic purposes or climate modification and being grown in lawns, grounds, golf courses, recreational areas and athletic fields.

DuPont™ ADVION® Mole Cricket Bait must only be used in accordance with the Directions For Use on this label.

GENERAL INFORMATION

- Not for use on turfgrass that is being grown for seed or on commercial sod farms.
- Not for use in nurseries and greenhouses
- Do not allow livestock or domestic animals to consume the bait or graze in treated areas.
- Do not apply this product through any type of irrigation system.
- Do not exceed 200 total pounds of ADVION® Mole Cricket Bait (0.44 lbs active ingredient) per acre per year.
- Do not formulate this product into other end-use products.

When to apply:

ADVION® Mole Cricket Bait contains the active ingredient indoxacarb in a formulation that is highly attractive to mole cricket adults and nymphs. ADVION® Mole Cricket Bait should be applied in the spring to control adult mole crickets before they lay eggs and in the late summer and fall to control large nymphs and newly emerged adults. For best results, apply in late afternoon to areas of turfgrass that are infested with mole crickets. If the soil is not moist, then it is important to irrigate before application to bring the mole crickets to the soil surface where exposure to ADVION® Mole Cricket Bait will be maximized. For optimal effectiveness, allow grass that is wet with dew, rainfall or irrigation to dry before application. Rainfall or irrigation within 2 to 3 days after application may reduce the effectiveness of ADVION® Mole Cricket Bait.

SPECIFIC USE DIRECTIONS

BROADCAST APPLICATION: ADVION® Mole Cricket Bait may be applied as a broadcast application at the rate of 50 to 200 pounds of product per acre. Calibrate and adjust equipment prior to application to ensure that the proper rate of product is uniformly applied over the treatment area. Repeat application after 7 days, if necessary.
