 Use for the prevention and control of Powderv Mildew, Botrytis, Stem Mildew, and
- Prevents fungal attacks of plant tissues

others as listed on the label

DIRECTIONS FOR USE It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

This product controls listed insects on contact or by ingestion. The product acts on insects by way of repellence, anti-feedant action and interference with the molting process. This product controls listed diseases by inhibiting mycelial fungal growth. The efficacy of this product is dependent on weather conditions, intensity of pest population, area of application, and physical stages of pests and crops. Do not store this product above 104°F or below 70°F for extended periods of time. Keep containers tightly closed and in original containers when not in use. Do not store exposed to ultraviolet light (sunlight) or moisture.

THAWING (MELTING) INSTRUCTIONS

If product is solidified, thaw (melt) it by standing product container in warm water. Make sure cap is tightly closed. Or set out in temperatures over 80°F for <1 gallon containers for 24 hours. Avoid direct exposure to temperatures over 104°F.

MIXING INSTRUCTIONS

This product contains cold pressed neem oil and requires only water for the appropriate use dilution. Add this product to a mixing tank or spray bottle with a little water and agitate thoroughly. For optimal mixing, ensure water temperature is above 45°F. continuous agitation. Agitate continuously while spraying. Nonuniform dilution can cause damage to plant or result in lowered effectiveness. **CROP USES** This product may be used on bulbs, cucurbits, fruiting vegetables.

Then add remaining water to the spray tank or spray bottle with

leafy and brassica (cole) vegetables, legumes, root and tuber vegetables, small fruit and berries, citrus and tropical fruits.

pome and stone fruits, tree nuts, herbs, and spices, grass, lawn, and ornamentals. **USE RATES**

(1) To Control Insects or Mites: Apply this product at 0.625–1.8% in sufficient amounts of water to achieve complete coverage in a

(2) To Control Diseases: Use at 1.2–1.8% in sufficient amounts of

7-10 day interval.

water to achieve complete coverage with a 10-14 day interval.

(3) To Control Nematodes and For Soil Use: Use at 1.2–2.4% in sufficient amounts of water to achieve complete coverage with a 10-14 day interval. This product is most effective when applied before insects or eggs are present in large numbers.

SPRAY DIRECTIONS Apply as a foliar spray or as soil drench to control listed pests.

When applied as a soil drench, avoid excessive run off. When using as a foliar application, ensure thorough coverage of plant surfaces. but avoid pooling or run off. Avoid spraying under conditions of high humidity and high temperature (>90°F). To avoid potential leaf burn,

apply the product in early morning or late evening. Always test the product on a small portion of plants for compatibility before treating the entire plants. Instructions for 1-Gallon Sprayer **Tablespoons**
