Turf Mark[®] Green

Green Spray Indicator for Turf Use

- See where you spray
- Indicates skips and overlaps
- Dissipates under sunlight or moisture
- Improves applicator safety

GENERAL DESCRIPTION:

Turf Mark[®] Green spray indicator is a natural green temporary colorant that shows exactly where application has occurred. The highly visible green color helps prevent skips, overlaps, and helps point and minimize drift, leaving turf looking lush and green after treatment. Turf Mark Green is safe, non-toxic, and won't harm people, animals, or the environment.

APPLICATION TIPS:

Flat fan spraying tips are recommended when applying Turf Mark. Increased volumes of spray solution should be used when Turf Mark is applied to hard-to-mark areas. Longer or thinner stands of turf or sod may be more difficult to mark due to the non-uniform marking surface. Increasing the total volume of spray solution applied to those areas should reduce marking difficulty.

Experimentation with the volume of spray solution and rate of Turf Mark applied per acre or area should allow each applicator to establish a rate that is functional and economical for each application. The more Turf Mark you use, the darker your spray pattern.

This product is non-toxic under OSHA standard 29 CFR 1910.1200 and SARA Title III. This product contains no chromium or other inert metals which are listed as inert hazards by California Proposition 65 or other regulatory guidelines.

APPLICATION RATES:

Suggested Use: Liquid Per 100 gal. (380 L) solution

AREA TO BE APPLIED	DORMANT	LIGHT	DARK
Greens, Tees	6-8 oz. (175-240 ml)	6-8 oz. (175-300 ml)	10-14 oz. (300-415 ml)
