KEEP OUT OF REACH OF CHILDREN

Green Maker

A Premium Lawn Food For Alkaline Soils!

HOW DO YOU USE IT?

Apply with fertilizer spreader set from chart below. Make applications every 4 to 6 weeks during the growing season. On warm season grasses such as Bermuda and St. Augustine, apply one bag per 7,200 square feet of lawn. Water in after application. Use caution around cement and lawn ornaments, as the iron will stain these items. **Florida Applications:** 4 annual feedings with the exception of Bahiagrass and Centipedegrass (2 feedings in the north and 3 feedings in the central and south). Apply this product at 4.2 lbs per 1,000 sq. ft.

On cool season grasses such as Bluegrass, Fescue, and Ryegrass apply one bag per 10,800 sq. ft. of lawn. Make applications in early spring, later spring and early fall. Use caution around cement and lawn ornaments, as the iron will stain these items. Around ornamentals and shrubs apply ¼ pound (about one cupful) for shrubs 3 to 4 feet across. Apply evenly under the shrub and water in well.

Around trees apply ¾ to 1 pound per each one inch of diameter. Apply evenly out to the drip line of the tree and water in well.

APPLICATION EQUIPMENT AND INSTRUCTIONS

This product can be applied with a drop or broadcast (rotary) spreader. For best results, apply this product evenly and uniformly over the turfgrass (lawn) area avoiding streaking, skips or overlaps. Before each application, determine the correct amount (lbs.) of product to place in the spreader hopper for the area to be treated. For example, if the label states to apply 4.2 lbs. per 1000 sq. ft. and your area is 2,500 sq. ft, then place 10.5 lbs. of product in the hopper and set the spreader setting at 4 1/4 (per table below) if using an Accugreen drop spreader.

A more uniform application can be made by spreading one-half of the recommended amount of this product over the turfgrass area and then applying the remaining one-half of this product at a right angle to the previous application direction.
NOTE: The spreader settings listed below are approximate. The speed at which you walk and the working condition of the spreader will affect the rate of application.

Spreader	Spreader Settings Lbs. of product per 1,000 sq. ft.	
	4.2 lbs.	6 lbs.
Scotts®/Republic Accugreen (Drop)	4 ¼	7
Scotts®/Republic Speedy Green (Broadcast)	3 ¾	6
ferti•lome®/Earthway Ev-N-Spred (Broadcast)	14	16

CAUTION: Iron stains sidewalks, driveways and ornamental cement lawn fixtures. Use caution around these items. If this product comes in contact with sidewalks, driveways or cement lawn fixtures, sweep product off with broom. Do not try to wash product off with water.

By using **ferti•lome® GREEN MAKER**, you can help correct alkalinity and with added iron, make your lawn a deeper green.
