

i STRIKE™

Insecticide Foam

- **Kills Termites**
(including Subterranean, Drywood & Dampwood Termites)
- **Kills wood-boring beetles**
- **Kills carpenter bees**
- **Kills other listed pests**
- **Ready-to-use**

- **No measuring or mixing**
- **Non-staining**
- **For indoor & outdoor spot and crack and crevice treatments**
- **Expands to cover those tough-to-reach areas**

ACTIVE INGREDIENTS:
Imidacloprid..... 0.05%
OTHER INGREDIENTS..... 99.95%
TOTAL..... 100.00%

EPA Reg. No. 87093-6-64405 EPA Est. No. 33595-MO-2 (Y)
EPA Est. No. 11623-GA-1 (J) EPA Est. No. 33595-MO-3 (Q)
EPA Est. No. 11623-GA-2 (A) EPA Est. No. 33595-MO-4 (N)

Postscript is first letter of code number on container.

STOP – READ THE LABEL BEFORE USE.
KEEP OUT OF REACH OF CHILDREN
For Residential Use Only

Not for sale, sale into, distribution and/or use in Nassau, Suffolk, Kings and Queens counties of New York.

NET WT. 1 LB. 2 OZ. (18 OZ.) (510.29 GRAMS)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Wear long sleeved shirt and long pants, shoes, and socks.

ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark.

PHYSICAL/CHEMICAL HAZARDS

CONTENTS UNDER PRESSURE. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not apply product directly into any electronic equipment (i.e., radios, televisions, computers, etc.), or where an electrical short circuit might result, such as in wall outlets, conduits, motors, switches, etc.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label. Use strictly in accordance with label Precautionary Statements and Directions for Use.

PRODUCT RESTRICTIONS

- Apply to surfaces only as spot and crack and crevice treatment.
- Do not apply this product in the open or on exposed surfaces, or in areas accessible to children.
- Do not apply near electrical hazards.
- Do not treat firewood.
- Do not reapply this product to a previously treated site or location before 3 months, unless insect activity is observed or suspected.
- Do not use this product as the only source of control for active, structural infestations by subterranean termites. This product is not a substitute for mechanical alteration, soil and foundation treatments. This product can be used to supplement soil applied termiticides, termite bait systems, or other products registered as the sole source for termite control. This product is intended for use as a supplemental product to kill subterranean termites that are found in above ground and other locations.
- Do not apply this product, by any application method, to certain types of wood, including: linden, basswood or other Tilia species.

HOW TO APPLY

Shake well before using. Hold can upright. Point away from face. Slowly press trigger to dispense foam. To minimize run-off, continue to hold the tip firmly against injection point for 5 seconds after releasing the trigger. Spot treatments with this product can be made, as a temporary control measure, in advance of the date when final treatment of the structure with soil and foundation treatments is completed. To minimize run-off, continue to hold the application tip firmly against the injection point for a full 5 seconds after releasing the dispenser trigger; this will allow product in the application hose to fully expand and enter the target area.

APPLICATION SITE

This product is for applications to insect galleries in damaged wood, in spaces between wooden structural members, or in voids within the construction. The locations that are intended for treatment may include, but are not limited to, exposed wooden elements in crawlspaces, basements, or attics, unexposed wooden elements inside walls or other structural voids, exterior wooden elements in decks, fencing or siding, channels in damaged wood, in spaces between wooden elements of a structure, and junctions between wood and foundations. This product is also for use in residential structures subject to termite or wood-infesting insect attack.

APPLICATION TIMING

Apply product to use sites when pests listed below are seen or found.

PESTS CONTROLLED

Termites, Wood-Infesting Beetles, ants (except for carpenter, pharaoh, fire and harvester) and Carpenter Bees.

Subterranean Termites: For use as a localized treatment to control infestations in above-ground areas of the structure, apply a sufficient quantity of foam into the galleries or voids in termite-damaged wood, or in the spaces between termite damaged wooden structural members and between the sill plate and foundation where wood is vulnerable.

Drywood Termites, Wood Infesting Beetles or Borers: For use in controlling drywood termites, wood-infesting beetles or borers; including powder post beetles, anobid or death-watch beetles, false powder post beetles, old house borers, wharf borers, or ambrosia or bark beetles. Apply a sufficient quantity of this product into voids or channels in damaged wood of a structure, or to cracks, crevices, and spaces in and between wooden portions of a structure or between wood and the foundation, and in locations vulnerable to attack such as crawlspaces.

Carpenter Bees: For use as a localized treatment. Apply a sufficient quantity of foam directly into gallery entrance holes. Following treatment with this product, the entrance holes may be plugged with a suitable material.

Ant Infestations (except for carpenter, pharaoh, fire and harvester): For use as a localized treatment to control or suppress ants in houses and other structures. Apply a sufficient quantity of foam by crack and crevice application. Apply enough foam to sufficiently cover the area, but do not allow excessive dripping or run-off to occur. When ant nests are located in decks, treat the interior cavity containing the nest site by injecting a sufficient quantity of this product to cover the area. Inject this product into voids where ants or their nests are present, or other places where these pests enter the structure or where they may have been seen or found. When ant nest site(s) are located in tree hollows or nonstructural wooden constructions (e.g., posts, fences, decks), treat the interior cavity containing the nest site by injecting a sufficient quantity of foam to cover the area.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container. Keep away from fire, sparks, heated surfaces, and avoid excessive heat (>130°F). Store in a cool, dry place inaccessible to children and pets. **Pesticide Disposal and Container Handling:** Do not puncture or incinerate! Non-refillable container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions.

WARRANTY

Read the entire Directions for Use and Warranty before using this product. By using this product, user or buyer accepts the following warranty. The directions for use of this product are believed to be adequate and must be followed carefully. It is impossible to eliminate all risks associated with the use of this product. Unintended consequences may result because of unknown factors. All such risks shall be assumed by the user or buyer. The seller is committed to providing high quality products. To the extent consistent with applicable law, the seller makes no warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond statements on this label. To the extent consistent with applicable law, the manufacturer or the seller shall not be liable for indirect, special, incidental or consequential damages. To the extent consistent with applicable law, the exclusive remedy of the user or buyer shall not exceed the purchase price paid.
