Nature-Cide Insecticidal Dust kills bed bugs, fire ants, fleas (egg, larval and adult stages), German cockroaches, house flies, Pharaoh ants and ticks (nymph and adult stages). Repels all stages of fleas and ticks (nymph and adult stages) for up to 11 weeks. Nature-Cide Insecticidal Dust can be used indoors on carpet, upholstery, pet bedding and outdoors on exterior walls where listed pests enter.

**DIRECTIONS FOR USE:** Read entire label prior to use; use as directed. Shake well before each use. Apply only to dry surfaces. Prior to any large area application, test a small, inconspicuous area and check later for any adverse effects. Apply in and around areas where insects may be crawling, hiding or living. The amount to apply varies depending upon infestation severity. Suggested application rate is 1-2 oz per 100 sq ft of surface area. For added control, simultaneously treat pets with Nature-Cide Flea & Tick Insecticide before reentry into treated areas.

**INDOOR TREATMENTS:** Apply more powder to areas where pets spend most of their time. Focus heavier treatments where dogs land as they jump off beds and elevated resting areas. **Pet Bedding:** Regularly dust pet bedding, kennel and sleeping areas. Reapply every 2-11 weeks year-round, or as needed, to maintain pest control and help reduce the reoccurrence of fleas and ticks. After multiple uses, discard pet bedding or launder to avoid dust buildup. **Carpets:** Brush lightly with a broom to force powder deep into carpet where fleas and their larvae exist. Wait at least one hour before lightly vacuuming to remove powder visible on carpet surface. For maximum efficacy, and when applying at lower rates, delay vacuuming for 24 hours. **Carpet Edges and Furnitures:** Powder may also be applied under the edges of carpeting around the tack strip that holds the carpet tight against the walls. For bed bugs, additional areas may be treated such as the cracks of bed frames, headboards and other furniture. Do not treat bed mattresses. Wipe away excess dust with a damp cloth to ensure your applications are inaccessible to future human/pet contact. Do not apply this product into electronic equipment (TVs, radios, computers, etc.). **Upholstery:** Remove loose cushions. Sprinkle along creases and into corners. Use a brush to lightly work powder into folds and creases. If excess powder adheres to a spot, brush out and remove with a vacuum. **Note:** Use caution when disposing/emptying vacuum bags to avoid breathing dust. Gently place in plastic bag and tie tightly to avoid disturbing dust then discard in trash.

**OUTDOOR TREATMENTS:** Many pest species enter buildings through exterior walls or relocate through interior adjoining walls. It is critical to properly treat these walls to kill those overwintering and translocating species. Treat walls by removing outlets and switch plate covers; puffing a light coating of dust into wall voids (not into boxes) thus layering a light dust onto the tops of electrical cables (a common traffic area). Also puff treatments into external cracks and crevices around window/door frames; common entrances for pests.

**PRECAUTIONARY STATEMENTS:** May be harmful if swallowed. Avoid breathing dust. May cause slight eye irritation. May cause allergic reaction in some individuals/pets. **FIRST AID: If in Eyes:** Immediately rinse eyes with plenty of water, including under eyelids. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. **If on Skin:** Thoroughly wash with soap and water. **If Inhaled:** Move to fresh air. **If Swallowed:** Immediately rinse mouth and drink plenty of water. In all cases, if irritation persists, call a poison control center (1-800-222-1222) or doctor for emergency medical treatment information. **Storage and Disposal:** Store in original, tightly closed container in a cool, dry place inaccessible to children and pets. Nonrefillable container; do not reuse or refill this container. Recycle empty container, or discard in trash.
