

# Overture™ Insecticide. New generation. New control over thrips.

It's all over for thrips in greenhouses. Thanks to its novel chemistry, new generation Overture™ Insecticide controls both adult and nymph stage thrips—including western flower thrips. Even those that are tolerant or resistant to other insecticides. *Overture's* new chemistry makes it an ideal rotation partner for thrips control.

Overture provides:

- Excellent control of thrips, including western flower thrips
- New chemistry and new mode of action
- Excellent resistance management tool and rotation partner
- Control of defoliating larvae of various lepidopteran insects (caterpillars)

## Greenhouse Pests Overture Controls

Thrips including western flower thrips

### Lepidopterous larvae including:

Azalea caterpillar	Southern armyworm
Beet armyworm	Spruce budworm
Cabbage looper	Tent caterpillars
Fall webworm	Tobacco budworm
Gypsy moth	Tomato hornworm
Nantucket pine tip moth	Yellowstriped armyworm

## Labeled Greenhouse Crops

Bedding plants  
Flowering plants  
Foliage plants  
Ground covers  
Ornamental plants (including poinsettia, hibiscus, gerbera daisy and chrysanthemums)  
Ornamental trees  
Shrubs

## Overture Essentials

<b>FORMULATION:</b>	WETTABLE POWDER IN WATER SOLUBLE PACKETS
<b>ACTIVE INGREDIENT:</b>	PYRIDALYL
<b>APPLICATION METHOD:</b>	FOLIAR SPRAY
<b>USE RATE:</b>	8 OZ. PER 100 GALLONS
<b>SIGNAL WORD:</b>	CAUTION
<b>REI:</b>	12 HOURS
<b>SAFETY:</b>	SAFE ON MOST BENEFICIAL INSECTS AND CROPS

## The Growing Family of Valent Professional Products

### Insecticides

Orthene® Turf, Tree & Ornamental Spray  
*Orthene* Turf, Tree & Ornamental Spray 97  
*Orthene* PCO Pellets

**\*NEW!** Overture™ Insecticide

Safari® Insecticide  
Tame® Insecticide

### Insect Growth Regulators (IGRs)

Distance® IGR  
TetraSan® Miticide

### Biological Insecticides

DiPel® PRO DF Biological Insecticide  
Gnatrol® Biological Larvicide

### Baits

*Distance* Fire Ant Bait

### Herbicides

BroadStar™ Herbicide  
Envoy Plus™ Herbicide  
SureGuard® Herbicide  
Velocity® Herbicide

### Plant Growth Regulators (PGRs)

Fascination® PGR  
ProGibb® T&O PGR  
Sumagic® PGR

# Overture™ INSECTICIDE

*The final note on thrips.™*

## Get control of thrips ...and keep it.

Thrips, especially western flower thrips, are a menace to greenhouses because they feed on flowers and buds. Damage can go beyond appearance, sometimes killing the affected plants. Thrips are also notorious for spreading lethal viral diseases, such as tomato spotted wilt virus (TSWV) and impatiens necrotic spot virus (INSV).

*Overture* features a new mode of action that makes it effective at controlling thrips both on contact and through ingestion. In addition to making it ideal as a rotation partner, the new generation chemistry controls thrips at all life stages.

## Winning the battle ...and the war.

### *Insecticide Resistance Management*

With its highly effective, new mode of action and new chemistry, *Overture* is intended for use in integrated pest management and/or integrated resistance management programs. By introducing it into your program, you can break up any current resistance problems and prevent future insecticide resistance from developing.

## Foe to thrips and worms. Friend to beneficial insects.

### *Safety to Beneficial Insects*

*Overture* does not significantly impact most natural beneficial insects, including ladybird beetles, lacewings and predatory bugs. The feeding activities of these predatory beneficial insects will aid in extending natural control of other insects and reduce the likelihood of secondary pest outbreaks.

### *Control of Caterpillars*

*Overture* actively controls the lepidopterous larvae that damage plant leaves and ultimately damage profitability, including azalea caterpillar, beet armyworm, cabbage looper, tobacco budworm, yellowstriped armyworm and many more.

- *Overture* 8 oz./100 gal. (spray)
- *Conserve*® 6 oz./100 gal. (spray)
- Untreated
