

The Ultimate Bed Bug Tool

The Pest Management Professional has many options when it comes to bed bug control. The most effective control is the application of insecticides and B&G offers you the best tools for insecticide application.

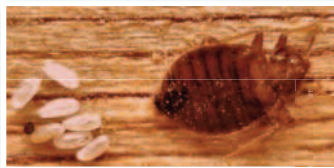

The PAS (Portable Aerosol System) from B&G is the Ultimate Bed Bug Tool. It allows you to apply a precise amount of insecticide to areas that are prone to bed bug infestation. Its aerosol spray deeply penetrates into crack and crevices and with the high volume of air, flushes bed bugs out from where they hide.

TREATMENT AREAS

- Mattress & Box Spring – Penetrates and kills without over application of insecticides
- Carpets – Aerosol penetrates deep for effective kill
- Furniture – Fast contact kill without the residue and liquid run off
- Baseboards – Deep Aerosol Penetration – Provides instant kill and control

“Reduces chemical usage by 2/3. Saves on chemical cost and increases efficiency.”

Bed bugs, once considered rare, have recently become increasingly prevalent.

TECHNICAL RESOURCES AVAILABLE

- **Bed Bug Training DVD** – Request a copy today.
- **Field Training and Demos** – Our local field representative will be glad to meet with you, train you on the operation of the PAS, and even accompany you on your next bed bug job.
- **In-House Technical Support** – Give us a call at 800-544-8811. Our in-house technical support will help answer any questions.

SEE WHAT THE CUSTOMER'S ARE SAYING:

Sometimes something comes along and all you can say is “WOW, this really works!” It has been sometime since something like the B&G PAS machine has come along in our industry and it could not have come at a better time. Bed bug jobs are pouring in almost faster than we can service them from new accounts and we needed something that would help us not only keep up, but to be effective and deliver results which could reduce callbacks and complaints. The PAS helped us to cut the time in half, lessen the man hours and deploy our service team to more calls with faster and better results. Once we found out how effective it was with bed bug jobs we extended it to larger roach cleanouts and the results were even more jaw dropping. If you are the competition and you are not using it...GOOD!

Ramon Rosa
Corporate Service Manager
Superior Pest and Lawn Management

“Less call-backs due to superior application and getting the job done right the first time.”

BENEFITS OF THE B&G PAS UNIT

- **Productivity** – The 1 gallon capacity allows you to do a full treatment without stopping to refill.
- **Flexibility** – Ability to use products that are not available in Aerosol form.
- **Dependability** – Simple, easy to use design. Built to B&G standards for years of service.
- **Easy to Maintain** – Tank can be removed for filling or cleaning.
- **Extremely Effective** – Provides the best liquid treatment, limits call backs.
- **Economical** – Half the price of the competition.
- **Saves You Money** – Uses 2/3 less chemical as compared to a liquid only bed bug treatment.

30 Day Money Back Guarantee – Use the B&G PAS Unit on your next Bed Bug job. If not completely satisfied, return to B&G for a full refund.

The Ultimate Bed Bug Tool

PORTABLE AEROSOL SYSTEM

The B&G ULV Portable Aerosol System gives you deep wall void penetration, crack and crevice along with localized fogging capabilities and costs much less than competitive equipment. It has the capability of also doing a liquid only application for crack and crevice work or an air only application for use in a flushing operation.

- One gallon stainless tank, can be easily removed from case for cleaning or filling.
- Brass & Stainless Steel gun with your choice of 9 in. or 18 in. extension.
- 10 ft self coiling hose (15 ft on Commercial Units)
- Unit can be removed from case for spot treatments.
- Many models available, including a commercial version, which features a fan cooled compressor along with a 15 ft hose.
- Liquid pressure is adjustable to give you from a heavy mist to ULV fog.
- All units are field repairable, no need to return the unit for service.
- Save 90% on the cost of purchasing Aerosols in a can, create your own with the Portable Aerosol System.

OTHER APPLICATIONS WHERE YOU CAN USE THE B&G PAS

- **Cockroach Control** – Provides both flushing and contact kill.
- **IPM Programs** – Limits the use of insecticides.
- **Crack & Crevice Applications** – Provides deep penetration into harborages.
- **Fogging Applications** – Use to fog wall voids or other areas for complete control.
- **Aerosol Applications** – Replaces Aerosol Cans; saves you up to 90% on chemical cost. Eliminates the hassle associated with disposal of empty aerosol cans.
