

# Plateau® Herbicide

for **Roadside Grass Seedhead Suppression**

Reduce mowing costs by regulating smooth brome grass growth and brome grass seedhead suppression on road shoulders, medians and underneath guardrails or guide rails and control undesirable thistles, grasses and broadleaf vegetation.

Professional  
Vegetation  
Management

**BASF**  
The Chemical Company

Objective	Rate	Application	Benefits
Regulate smooth brome grass growth on road shoulders, medians and underneath guardrails or guide rails; control labeled annual grasses and broadleaf weeds	4 to 8 oz/A <b>Plateau</b>	During the spring while smooth brome grass is actively growing, but before seedhead production	Lower annual mowing cost  Less liability due to fewer mowings
Regulate smooth brome grass seedhead growth on road shoulders, medians and underneath guardrails and guide rails; control thistles and other undesirable broadleaf vegetation	4 to 8 oz/A <b>Plateau</b> + 4 to 6 oz/A <b>Overdrive®</b> herbicide or other suitable broadleaf herbicide	During the spring while smooth brome grass and thistles are actively growing, but before seedhead production	Increased roadside aesthetics  Increased available man-hours

**Alexandria, MN.** Smooth brome grass and reed canarygrass roadside plot treated with **Plateau** at 6 oz/A + NIS at 0.25% on May 21. Plot on August 6 (77 days after treatment) has greater than 95% seedhead reduction and 50% height reduction.

**Norfolk, NE.** Smooth brome grass plot treated with **Plateau** at 8 oz/A + NIS at 0.25% on May 23. Plot on October 5 (135 days after treatment) has greater than 95% seedhead reduction.

## RECOMMENDED RATES

- 4 to 8 ounces/acre broadcast on smooth brome grass roadsides plus 0.25% nonionic surfactant.
- Use higher rates on reed canarygrass and heavier soils.
- Use lower rates on sandy soils and drier sites.
