

PULVERIZE[®]

WEED & GRASS KILLER

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Pulverize Weed & Grass Killer is a fast-acting weed, grass, algae and moss killer.

Incidental over spray will not stain concrete or pavement. Pulverize Weed & Grass Killer is a non-selective herbicide that controls many common annual weeds. Pulverize Weed & Grass Killer suppresses the growth of some bi-annual and perennial weeds. It can be used in cultivated areas prior to planting grass or flowers. Areas can be re-sown five days after treatment. Pulverize Weed & Grass Killer can be used at any time during the year. Best results are obtained with young, actively growing weeds, less than five inches in size.

Shake well before using. Do not dilute. Spray weeds and grasses thoroughly when weather is dry and warm (application rate: 6-9 oz/yd²). If rain falls within three hours of application an additional application may be required. Repeat treatment every 2 to 3 weeks for control of new growth. Avoid spraying desirable plants. For optimum results spray weeds before they reach 5 inches in size. For control of dandelions and other large rooted weeds, first injure plant by splitting top of root, then squirt 20 times with sprayer set on stream setting.

Controls: Annual bluegrass, chickweed, corn spurry, dandelion, groundsel, lamb's-quarters, large crabgrass, mouse-eared chickweed, mustards, plantain, redroot pigweed, round leaved mallow, sheep sorrel, shepherd's-purse, stinkweed, thistle, moss, algae, and lichens.

Use Sites: Around ornamental flowers, mature shrubs and trees; spot treatment in lawns bordering garden areas; bark mulch; around planters, containers, raised beds and other structures holding flowers, trees, shrubs and vegetables; and in planting beds prior to planting grass, flowers or vegetables.

CAUTION
KEEP OUT OF REACH OF CHILDREN
