Completely Safe

Red Lake Diatomaceous Earth (RLE)®

is a natural occurring blend of **Diatomaceous Earth** - skeletal remains of hard shelled fresh water organisms and **Calcium Montmorillonite (Calcium Bentonite)** - derived from weathered volcanic ash.

Diatomaceous Earth

Montmorillonite

Red Lake Earth® is OMRI listed for use in organic production and is registered for use as an anti-caking agent or inert carrier in an amount not to exceed 2% of the total diet.

Red Lake Earth® is prepared by drying at a low heat to prevent the organic components from being lost. The delicate structural integrity of the diatoms is preserved through this careful process.

Red Lake Earth® is environmentally friendly, completely SAFE and does not contain any antibiotics or harmful chemicals.

4 lb Jug with Shaker Lid

Item Number - **W230**

UPC 0-58633-10230-1

8 Jugs / Case

UPC 1-00-58633-10230-8

Pallet (54 Cases/432 Jugs)

UPC 2-00-58633-10230-5

USE AS AN ANTI-CAKING AGENT

DIATOMACEOUS RED LAKE earth®

with Calcium Bentonite

FOOD CHEMICAL CODEX GRADE

Improves flow-ability and mix-ability of all types of feed

Benefits of using RED LAKE EARTH®

At an inclusion rate of .5% - 2% feed trials have shown:

Poultry

- * Improved feed conversion
- * Lower mortality rates
- * Healthier birds
- * Improved weight gain
- * Improved shell quality

Cattle & Swine

- * Reduced manure odor
- * Reduced Hydrogen Sulfide

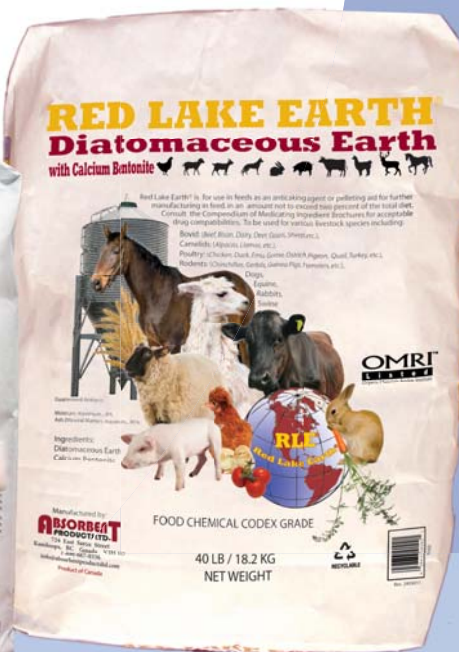

Based on University testing RLE® is shown to have many benefits to the poultry, cattle and other livestock industries when incorporated into the regular feed program and as an anti-caking agent and flow aid.
